**How Do Banking Crises Affect Bilateral Exports?** Mr. Youssouf Kiendrebeogo, 2013-06-19 This paper investigates whether banking crises are associated with declines in bilateral exports We first develop a simple open economy model in which banking crises translate into negative liquidity shocks leading to collapses in exports through supply side and demand side shocks We then estimate a gravity model using a sample of developed and developing countries over the period 1988 2010 The results suggest that crisis hit countries experience lower levels of bilateral exports particularly in developing countries where supply side shocks are found to be relatively more important than demand shocks In developing countries exports of manufactured goods are disproportionately hurt by banking crises and this negative effect is stronger in industries relying more on external finance These findings are robust to correcting for potential endogeneity to changes in the sample and to alternative estimation methods **Regional Integration and Democratic Conditionality** Gaspare M. Genna, Taeko Hiroi, 2014-12-05 How effective are democracy clauses of regional integration organizations RIOs in promoting democratization and democratic consolidation among

member states RIOs are increasingly adopting democracy only clauses in their treaties requiring democracy and political stability as a condition of membership Stable democracy is a collective good for RIO members without political stability uncertainty regarding economic exchange increases undermining the promise of integration The presence of powerful countries may be necessary for the RIOs to legalize democratic conditionality In this book the authors argue that once established democracy clauses exert an independent influence in promoting and defending democratic norms and institutions within the member states by increasing the transparency and credibility of democratic commitment and sanctions for violation The findings based on the analysis of 40 RIOs around the world and in depth analysis of the European Union the Common Market of the South and the Economic Community of West African States indicate that RIO democracy clauses help prevent democratic backsliding and coups and stimulate democratization and consolidation With its global scope originality and theoretical rigor this is the first book to catalogue democracy clauses adopted by RIOs worldwide with a thorough analysis of their effectiveness

**Global Trade and Conflicting National Interests** Ralph E. Gomory, William J. Baumol, 2022-06-07 Ralph Gomory and William Baumol adapt classical trade models to the modern world economy In this book Ralph Gomory and William Baumol adapt classical trade models to the modern world economy Trade today is dominated by manufactured goods rapidly moving technology and huge firms that benefit from economies of scale This is very different from the largely agricultural world in which the classical theories originated Gomory and Baumol show that the new and significant conflicts resulting from international trade are inherent in modern economies Today improvement in one country's productive capabilities is often attainable only at the expense of another country's general welfare The authors describe why and when this is so and why in a modern free trade environment a country might have a vital stake in the competitive strength of its industries

*International Finance* H. Kent Baker (ed.), Leigh A. Riddick, 2013

Understanding the current state of affairs and tools available in the study of international finance is increasingly important as few areas in finance can be divorced completely from international issues. International Finance reflects the new diversity of interest in international finance by bringing together a set of chapters that summarizes and synthesizes developments to date in the many and varied areas that are now viewed as having international content. The book attempts to differentiate between what is known, what is believed, and what is still being debated about international finance. The survey nature of this book involves tradeoffs that inevitably had to be made in the process given the vast footprint that constitutes international finance. No single book can cover everything. This book however tries to maintain a balance between the micro and macro aspects of international finance. Although each chapter is self-contained, the chapters form a logical whole that follows a logical sequence. The book is organized into five broad categories of interest: 1. exchange rates and risk management; 2. international financial markets and institutions; 3. international investing; 4. international financial management; and 5. special topics. The chapters cover market integration, financial crisis, and the links between financial markets and development in some detail as they relate to these areas. In each instance, the contributors to this book discuss developments in the field to date and explain the importance of each area to finance as a field of study. Consequently, the strategic focus of the book is both broad and narrow, depending on the reader's needs. The entire book provides a broad picture of the current state of international finance, but a reader with more focused interests will find individual chapters illuminating on specific topics.

**Bringing Forth Prosperity** Benjamin Bobo, 2022-09-01. Path to Capacity Innovation: An Africa MNC Strategic Alliance. A policy framework is advanced, proposing a strategic alliance between African countries represented by NEPAD and the multinational corporation, with input from the NGO and couched upon an NEPAD MNC-NGO cross-fertilizing integrative structure. Capacity innovation is the key to Africa's transformation; with the appropriate catalysts, innovation and transformation are but a matter of time in gestation. The first of two major catalysts necessary to prompting this change, so long sought by Africans, came at the adoption of the New Partnership for Africa's Development. It is one of the most profound collaborations of African Heads of State. The second catalyst is proposed in this work in the form of the multinational corporation as change agent for the innovation process, working in alliance with NEPAD as Africa's spokesperson for innovation. The policy framework for African capacity innovation is the material product, along with discourse for redress of corruption and security policy narrative for protecting the assets of multinational corporations. Bringing Forth Prosperity: Capacity Innovation in Africa questions capital
