Affect-Language Interactions in Native and Non-Native English Speakers Rafał Jończyk, 2016-12-28 This volume provides an up to date and evaluative review of theoretical and empirical stances on emotion and its close interaction with language and cognition in monolingual and bilingual individuals Importantly it presents a novel methodological approach that takes into account contextual information and hence goes beyond the reductionist approach to affective language that has dominated contemporary research Owing to this pragmatic approach the book presents brand new findings in the field of bilingualism and affect and offers the first neurocognitive interpretation of findings reported in clinical and introspective studies in bilingualism This not only represents an invaluable contribution to the literature but may also constitute a breakthrough in the investigation of the worldwide phenomenon of bilingualism Beginning with a thorough review of the history and current state of affective research and its relation to language spanning philosophical psychological neuroscientific and linguistic perspectives the volume then proceeds to explore affect manifestation using neuropragmatic methods in monolingual and bilingual individuals In doing so it brings together findings from clinical and introspective studies in bilingualism with cognitive psychophysiological and neuroimaging paradigms By combining conceptual

understanding and methodological expertise from many disciplines this volume provides a comprehensive picture of the dynamic interactions between contextual and affective information in the language domain Thus Affect Language Interactions in Native and Non Native English Speakers A Neuropragmatic Perspective fosters a pragmatic approach to research on affective language processing in monolingual and bilingual population one that builds bridges across disciplines and sparks important new questions in the cognitive neuroscience of bi and multilingualism
