The central thesis of this book is that Art Spiegelman's comics all identify deeply

rooted madness in post Enlightenment society Spiegelman maintains in other words that the Holocaust was not an aberration but an inevitable consequence of modernisation In service of this argument Smith offers a reading of Spiegelman s comics with a particular focus on his three main collections Breakdowns 1977 and 2008 Maus 1980 and 1991 and In the Shadow of No Towers 2004 He draws upon a taxonomy of terms from comic book scholarship attempts to theorize madness including literary portrayals of trauma and critical works on Holocaust literature

Bertrand Russell and the Nature of Propositions Samuel Lebens, 2017-05-25 Bertrand Russell and the Nature of Propositions offers the first book length defence of the Multiple Relation Theory of Judgement MRTJ Although the theory was much maligned by Wittgenstein and ultimately rejected by Russell himself Lebens shows that it provides a rich and insightful way to understand the nature of propositional content In Part I Lebens charts the trajectory of Russell's thought before he adopted the MRTJ Part II reviews the historical story of the theory What led Russell to deny the existence of propositions altogether Why did the theory keep evolving throughout its short life What role did G F Stout play in the evolution of the theory What was Wittgenstein's concern with the theory and if we can't know what his concern was exactly then what are the best contending hypotheses And why did Russell give the theory up In Part III Lebens makes the case that Russell's concerns with the theory weren't worth its rejection Moreover he argues that the MRTJ does most of what we could want from an account of propositions at little philosophical cost This book bridges the history of early analytic philosophy with work in contemporary philosophy of language It advances a bold reading of the theory of descriptions and offers a new understanding of the role of Stout and the representation concern in the evolution of the MRTJ It also makes a decisive contribution to philosophy of language by demonstrating the viability of a no proposition theory of propositions

Sources for Studying the Holocaust Paul R. Bartrop, 2023-04-14 Sources for Studying the Holocaust provides a pathway for readers to engage with questions about what sources can be used to study the Holocaust For many historians the challenge has been how to rescue the story from oblivion when oft used sources for other periods of history introduce even more issues around authenticity and reliability What can be learned of what transpired in

villages and towns numbering several thousand people when all its Jewish inhabitants were totally obliterated through Nazi action Who can furnish eyewitness testimony if all the eyewitnesses were killed How does one examine written records preserving knowledge of facts or events where none were kept or survived the onslaught And what weight do we put upon such resources which did manage to endure the destruction wrought by the Holocaust Each chapter looks at one of a diverse range of source materials from which scholars have rescued the history including survivor testimony diaries letters newspaper accounts photographs trial documents artefacts digital resources memorials films literature and art Each chapter shows how different types of records can be utilised as accurate sources for the writing of Holocaust history Collectively they highlight the ways in which all material even the most fragmentary can be employed to recreate a reliable record of what happened during the Holocaust and show how all sources considered can be employed to find meaning and understanding by exploring a range of sources deeply This book is a unique analysis of the types of sources that can be used to access the history of Holocaust It will be of invaluable interest to readers students and researchers of the Holocaust
