Testimonials

1. This person successfully passed the AZ 900 exam last Friday. Despite facing questions they were unfamiliar with and feeling the exam was comprehensive, they managed to clear it. Their preparation involved resources from Microsoft Learn, Scott Duffy's Udemy course, and John Savill's crash course on YouTube.
2. The exam turned out to be more challenging than anticipated. Upon passing, instead of elation, they were taken aback by the intricacy of the questions. Their six-day study regimen covered vast material, yet they felt only 20% of it appeared in the exam. The questions blended familiar and unfamiliar content designed to be particularly challenging. They believe the rigorous format ensures only those truly knowledgeable can succeed. Their study resources included Whizlabs, TutorialsDojo, Udemy courses, and Microsoft's free learning path. Explanation When moving to a pay as you go subscription model in Azure the expenditure model transitions to Operating Expenditure OpEx In the OpEx model costs are incurred for services as they are used which is characteristic of cloud services and pay as you go plans This approach contrasts with the Capital Expenditure CapEx model which involves upfront investment in physical infrastructure and is more typical of on premises environments The shift to OpEx allows for greater flexibility and scalability as costs are based on actual usage rather than upfront investments Public cloud is a deployment model not an expenditure model Azure Reservations can provide cost savings in Azure but they are a method of payment within the OpEx model rather than a separate expenditure model Capital Expenditures or CapEx is defined as funds used allocated by organizations to obtain upgrade and maintain physical assets that are paid upfront such as data centers These expenditures are generally nonrecurring and result in the acquisition of permanent assets The Azure Reservations service is an example of a CapEx model Operating Expenditures or OpEx is defined as funds that are used by organizations for their day to day operations Think of OpEx as your electricity and water bill The more you use the higher the charges Azure on demand or pay as you go pricing is an example of an OpEx model Hence this correct answer is Operating expenditure
