**The Report: Nigeria 2013** Oxford Business Group, 2013-12-04. As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent. Natural resources, oil and gas in particular, comprise the country's single largest revenue earner, but the 170m person economy also has seen significant activity in recent years in the industrial, financial, telecoms and, as of 2013, power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of domestic and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant shake up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and agricultural sectors have strengthened medium term prospects.
