TEACHER ACCESS:

This Google product is in a "Force Copy" format, it also comes in a pdf. The Google link is here: [Google makes an editable copy for your Google Drive!](#) You may print it as it appears above, or edit it to fit your needs more specifically. *Please retain the copyright information at the bottom of the document.

TO USE:

1. This activity has 3 parts. The first is assigning the test review topics for each group. I used the NGSS standards and my state specific standards to create these topic cards. Please feel free to edit these to fit the needs of your students.
2. In groups of 4, assign or have your student choose which science review topic they wish to create a review square for. Try to have each topic assigned or chosen by a group so all testable material is reviewed.
3. Groups spend about 1 hour reviewing, planning and sketching the content in their review squares. They can access class rules, your text, their science spirals or the internet to address each topic bullet point.
4. Each student will be responsible for 1-2 bullet points. Individually they will sketch out their images and assigned review information. You may use the [NGSS Science Practices Sheet](#), if it helps.
5. As a group, come up with a plan on how to lay out the images and information on the larger square. Make sure to include a title and key take home message about the square is about.
6. In the following class periods, students use sidewalk chalk and [chalk markers](#) to create a visual and write review information. Be sure to include clear images, diagrams and easy definitions for each topic square.
7. During the last sessions, students travel around to the squares and take notes on the topics for state testing review. You have the choice of having students present the squares as a group or having them "teach" out the assigned review materials. Last year I did a combo of presentations and "teaching."
