Missions Kristin Bailey Wilson, Regina L. Garza Mitchell, 2018-01-24 Historically community colleges have served societal and functional missions that expanded over time with the result of trying to achieve multiple goals for multiple audiences This volume explores the forces currently shaping community college missions and the resulting tension between stated goals assumed goals and achievement of those goals In an era of increasing accountability tighter coupling and the need to do ever more with fewer resources mission focus is vital to college survival Explore such issues as the unspoken social contract transfer developmental education noncredit education dual enrollment workforce development the free college movement and planning for the future The topics are explored thoughtfully from both scholarly and practical perspectives highlighting the forces that shape community college missions This is the 180th volume of this Jossey Bass quarterly report series Essential to the professional libraries of presidents vice presidents deans and other leaders in today's open door institutions New Directions for Community Colleges provides expert guidance in meeting the challenges of their distinctive and expanding educational mission **General International Law in International Investment Law**, 2024-01-27

General international law is part and parcel of investor state arbitration This is the case not only regarding treaty law and state responsibility but also with respect to matters such as state succession the international minimum standard and state immunity all of which feature regularly in investor state arbitration Yet although general international law issues arise in almost every investment case and often require extensive research no systematic exploration of the relationship between the two exists This Commentary is the first to fill this gap providing a comprehensive treatment of the role of general international law in international investment law It engages in detail with central matters of general international law including in the practice of investment arbitration tribunals moving beyond existing works which focus solely on procedural and institutional provisions The Commentary's forty six chapters do not focus on a single source or subject Instead each concentrates on a specific relevant article from a particular source of public law such as the Vienna Convention on the Law of Treaties 1969 or the International Law Commission's Articles on the Responsibility of States for Internationally Wrongful Acts 2001 among others The entries combine detailed analysis with an examination of procedural and substantive aspects such as nationality and unjust enrichment and respond to the following questions how have investment tribunals interpreted and applied the specific rule of general international law To what extent and why does such interpretation and application align with or deviate from the practice by other international courts or tribunals How could and should investment tribunals

interpret and apply rules that have yet to feature in investment arbitration This unique format means this commentary will serve as a central guide for all relevant case law and scholarship on international investment law

Climate Change as Political Catastrophe Ross Mittiga, 2024-01-24 There is now clear scientific consensus that without immediate and decisive action the world risks climate catastrophe This has fueled climate emergency declarations among activist groups and increasingly among local state and supranational governments But what exactly counts as a climate catastrophe and what does catastrophic climate change portend for contemporary societies This book argues that climate change is politically catastrophic insofar as it threatens to undermine the material conditions that make justice and by extension stable democratic government possible It then uses the lens of catastrophe to bring into focus pressing questions concerning how to navigate trade offs between fairness and precautionary efficacy in the design of climate policy the permissibility of authoritarian climate emergency powers and the nature and role of climate disobedience Apart perhaps from the spectre of nuclear annihilation human civilization has never had to reckon with a threat so final and encompassing as that of climate catastrophe Much as some have argued that supreme necessity alters the contours of what is permissible in war this book starts from the premise that the credible threat of politically catastrophic climate change upends many of the most basic and widely shared assumptions in liberal and democratic thought

The response to and cost of meningococcal disease outbreaks in university campus settings Sean D. Candrilli,Samantha Kiyomi Kurosky,2019-10-13 Invasive meningococcal disease IMD is a contagious bacterial infection that can occur sporadically in healthy individuals Symptoms are typically similar to other common diseases which can result in delayed

diagnosis and treatment until patients are critically ill In the United States IMD outbreaks are rare and unpredictable During an outbreak rapidly marshalling the personnel and monetary resources to respond is paramount to controlling disease spread If a community lacks necessary resources for a quick and efficient outbreak response the resulting economic cost can be overwhelming We developed a conceptual framework of activities implemented by universities health departments and community partners when responding to university based IMD outbreaks Next cost data collected from public sources and interviews were applied to the conceptual framework to estimate the economic cost both direct and indirect of a university based IMD outbreak We used data from two recent university outbreaks in Oregon as case studies Findings indicate a university based IMD outbreak response relies on coordination between health care providers insurers university staff media government and volunteers along with many other community members The estimated economic cost was 12.3 million inclusive of the cost of vaccines 7.35 million Much of the total cost was attributable to wrongful death and indirect costs e.g. productivity loss resulting from death Understanding the breadth of activities and the economic cost of such a response may inform budgeting for future outbreak preparedness and development of alternative strategies to prevent and or control IMD
