A Full-powered Cabin Cruiser — "Veradaine."

Probably there are more craft of this type on the Clyde than in any other part of the country, and so it is fitting that we should turn to that district for an example. "Veradaine," the boat now under discussion, is actually in Russian hands on the Baltic, but was designed and built at Dumbarton by McLaren Bros. Her dimensions are: length 40 ft., beam 8 ft. 6 in., draught 4 ft. 6 in., and she is fitted with a 30 h.p. four-cylinder Thornycroft motor, giving a speed of nine knots. Reference to the plans shows the wide V sections forward giving great lifting power, and of great value in a head sea. The mid sections are rather flat, which, in conjunction with a ton of metal in an outside keel, makes for great stability. The stern is of "cane" form, a type that has much to recommend it in all cases where speed is not great in proportion to length.

Right forward is the crew's accommodation; then comes a galvanized engine-room, with 6 ft. head room under the coach roof. Next we have a pantry and lavatory on the port and starboard sides respectively, whereby the main cabin is well removed from the machinery and from the crew's quarters. All of the saloon, where, by the way, two people can sleep in comfort, is a roomy cockpit, whence the boat is steered, the engine controls being carried back to the same point. A funnel exhaust, it will be noted, is employed. Finally, a couple of pole masts are fitted. They would carry loose-fisted lug sails in case of emergency or for studying purposes in rough weather.

A full-powered motor yacht, 40 ft. by 8 ft. 6 in., by 4 ft. 6 in.; 30 h.p. engine; speed, 9 knots.
