enterprise ranging from leprosy and syphilis to tuberculosis and SARS Baldwin offers a deeply historical and comparative understanding of HIV in the industrialized world Lawrence O Gostin author of Public Health Law Power Duty Restraint Although a vast literature has emerged to chronicle and reflect on the history of the AIDS epidemic since it was first reported almost a quarter of a century ago there is nothing like Peter Baldwin s probing and synthetic analysis of AIDS in the industrialized world Building on his masterful Contagion and the State in Europe 1830 1930 Baldwin has provided a complex historical tapestry of how an epidemic threat has challenged and exposed democracies that thought infectious threats a thing of the past Ronald Bayer author of Private Acts Social Cosequences Aids and the Politics Of Public Health and coauthor with Gerald Oppenheimer of AIDS Doctors Voices from the Epidemic **Imagining Surveillance** Peter Marks,2015-06-23 Presents the first full length study of the depiction and assessment of surveillance in literature and film **Christian Bioethics** C. raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present. Headed your way over the coming decades, new biotechnologies that can powerfully alter your body and mind. The possibilities are tantalizing: Rejuvenation therapies offering much longer lives—160 and even beyond—in full vigor and mental acuity. Cognitive enhancement through chemical or bioelectronic means, the rough equivalent of doubling or tripling IQ scores. Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime: body shape, athletic ability, intelligence, personality. Bioelectronic devices for modulating your own brain processes, including your pleasure centers, a potentially non-stop high. Direct control of machines by thought and perhaps direct communication with other people, brain-to-brain, a new dimension of sharing and intimacy. But some of the potential consequences are also alarming. A growing rift between the biologically enhanced and those who can't afford such modifications. A constant cycle of upgrades and boosts as the bar of normal rises ever higher. Humans 95. Humans XP. Humans 8. The fragmentation of humankind into rival bioenhancement clusters. A gradually blurring boundary between person and product. Extreme forms of self-modification with some individuals no longer recognized as unambiguously human.
