*7th International Conference on Tourism Research* Prof Rishi Balkaran, Dr Chris Hattingh, 2024-03-18 These proceedings represent the work of contributors to the 7th International Conference on Tourism Research ICTR 2024 hosted by the Centre for Tourism Research in Africa at the Cape Town Hotel School Cape Peninsula University of Technology South Africa on 18-19 March 2024. The Conference Chair is Prof Rishi Balkaran and the Programme Chair is Dr Chris Hattingh, both from Cape Peninsula University of Technology CPUT South Africa. ICTR is a well-established event on the academic research calendar and now in its 7th year, the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. Today more than ever, there is a need for research and scientific guidance as the tourist sector struggles to cope with the consequences of the Covid-19 pandemic, inflation, socio-political turbulences, climate change, and disaster risk.

Responsibility in Small Things Monde Ndandani, 2020-08-24 Aspiring to be upright and honourable. This book is about metaphorical bricks, small things that make walls of all types of buildings within which people work and live. The figurative walls in the pages of this book are the Noah social types of the holy Bible. Behaviour is the function of character. A well-behaved person, young and old, develops to be a paragon of virtue, a rare species amongst the peoples of this world. Universal and generic good behavior project starts with casual greeting. One's family members in the morning and after intervals of absence from one's home. Greeting people anywhere should be spontaneous. Children learn being courteous from their homes, same as telling the truth all the time, giving lies no space. Hence building average good and steadfast citizenry is the responsibility of each homestead and family. If being sturdy is the essential feature of leadership, then every citizen in any country in the world can have her/his turn to lead.

*Childbirth, Vulnerability and Law* Camilla Pickles, Jonathan Herring, 2019-08-23 This book is inspired by a statement released by the World Health Organization directed at preventing and eliminating disrespectful and abusive treatment during facility-based childbirth. Exploring the nature of vulnerability during childbirth and the factors which make childbirth a site for violence and control, the book looks at the role of law in the regulation of professional intervention in childbirth. The WHO statement and other published work on mistreatment, obstetric violence, birth trauma, birth rape, and dehumanised care all point to the presence of vulnerability, violence, and control in childbirth. This collected edition explores these issues in the experience of those giving birth and for those providing obstetric services. It further offers insights regarding legal avenues of redress in the context of this emerging area of concern. Using violence, vulnerability, and control as a lens through which to consider multiple facets of the law, the book brings together innovative research from an interdisciplinary selection of authors. The book will appeal to scholars of law and legal academics specifically in relation to tort, criminal law, medical law, and human rights. It will also be of interest to postgraduate scholars of medical ethics and those concerned with gender studies more broadly.

Mineral

Solubilizing Microorganisms (MSM) and their Applications in Nutrient Bioavailability, Bioweathering and Bioremediation, Volume II Muhammad Zahid Mumtaz, Maqshoof Ahmad, Hassan Etesami, Adnan Mustafa, 2024-04-18 Bioweathering is the dissolution of rocks and mineral substrates carried out by microorganisms along with mechanical and chemical processes The application of bacteria in biomining is a biotechnological approach for the extraction and recovery of metals from ores Microbes interact with minerals as a strategy to colonize and exploit habitats where the environmental parameters disadvantage other microorganisms and they demonstrate the capacity to scavenge critical elements with low bioavailability such as iron and phosphorus There is an ongoing need to improve soil fertility and crop production particularly in dry places to remediate toxic soils and clean stone artworks and structures A more complete understanding of the ecology of mineral weathering processes mediated by the microbiome may provide a significant opportunity for researchers to develop novel solutions to developing challenges in agriculture the environment and industry
