Amplis is used together with other monitored parameters, such as haemodynamics, SpO₂ and EtCO₂ to provide clinicians with a full picture of the patient status during anaesthesia.

Et Control™

Et Control™ provides target control of volatile agent and patient oxygen, with an intelligent hypoxic guard ensuring minimum O₂ is delivered.

Advanced Breathing System (ABS)

At a small volume of 2.7 litres, the advanced breathing system of the Aesop Carestation helps drive industry-leading wash-in, wash-out times, and fast response times.

Electronic Gas Mixing

Setting the standard for electronic anaesthesia gas mixing systems by offering a 100-millisecond mixer response time, even during dramatic flow changes. Gas flow sensing technology helps ensure safe operation as gas flow is checked up to 100 times per second.

Navigator

Navigator Applications Suite software is a smart technology that analyses drug therapy information to help model and predict the effect of supported anaesthesia-related drugs and drug interactions. Navigator helps provide valuable information to support you in optimising patient management based on your clinical judgment.

Centricity Anaesthesia™

Centricity™ provides high quality integration with data collection from medical devices and seamless integration with hospital information systems, helping clinicians to see the patient data clearly and accurately.
