Thomas, 2019-07-23 This collection presents educational assessment research from Latin America adding to a relatively small  
but growing body of research considering educational assessment and evaluation issues in this large region The  
predominance of Chile reflects its early highly centralized education system and the fact that it adopted national testing  
before other Latin American countries It was also an early participant in international assessment programmes Other  
countries have followed the trend of implementing national testing and to a lesser extent participating in international  
surveys The complementary development of technical expertise in quantitative research methods has enabled extensive  
analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported  
provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that  
allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters  
in this book were originally published as a special issue of Assessment in Education Principles Policy and Practice      CTET
