Parliament. House of Commons. Northern Ireland Affairs Committee,2015 From the reckless high risk attitude of many banks pre financial crisis the pendulum appears to have swung too far back in the opposite direction Over the past year the Northern Ireland economy has shown very welcome signs of recovery with many new jobs recently being announced and the banks themselves showing a return to profitability The banks need to build on this It is regrettable that banks such as FTB and Danske have chosen not to participate in HM Government s Funding for Lending Scheme thereby potentially denying Northern Ireland further capacity for growth The banks have assured us they are open for business it is essential that they now put their money where their mouth is to help small businesses play their part in Northern Ireland s economic recovery Customer service and IT services need to improve considerably for banks themselves to really play their part **Military Review** ,2013 **After the Education Wars** Andrea Gabor,2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world

After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools
