**Genre-based Automated Writing Evaluation for L2 Research Writing** E. Cotos,2014-09-02 Research writing and teaching is a great challenge for novice scholars especially L2 writers This book presents a compelling and much needed automated writing evaluation AWE reinforcement to L2 research writing pedagogy *The Future of Liberal Education* Timothy Burns,Peter Lawler,2016-04-14 Liberal Education once the whole of American Higher Education has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the very serious challenges it faces in the 21st century even from some of its alleged friends and why it is

important to sustain and expand liberal education's place in American colleges and universities. Proponents and critics of liberal education alike will benefit from these insightful essays. This book was originally published as a special issue of *Perspectives on Political Science*. **Talent Development in European Higher Education** Dr. Marca V.C.

Wolfensberger, 2015-02-10 This book examines the much debated question of how to unleash the potential of young people with promising intellectual abilities and motivation. It looks at the increasingly important topic of excellence in education and the shift in focus towards the provision of programs to support talented students in higher education. It provides a systematic overview of programs for talented students at northern European higher education institutions (HEIs). Starting in the Netherlands where nearly all HEIs have developed honors programs over the past two decades, the book explores three clusters of countries: the Benelux, the Nordic, and the German speaking countries. For each of these countries, it discusses the local culture towards excellence, the structure of the education system, and the presence of honors programs. In total, the book reviews the special talent provisions for nearly four million students at 303 higher education institutions in eleven countries. In addition, it offers an analysis of the reasons to develop such programs, a look into the future of honors education, and a practical list of suggestions for further research. The Sirius Program assigned Marca Wolfensberger to carry out this research.
