Grade November 2013 Economic Memorandum

Florian H. A. Schmidt

Grade November 2013 Economic Memorandum:

Globalized Finance and Varieties of Capitalism H. van Zon, 2016-05-01 Hans van Zon analyzes the financialization of developed capitalism and argues that the emergence of finance as a dominant force has contributed to the relative decline of the West. He demonstrates that the neo liberal model is inherently unstable and undermines capitalist economies which can only function if they are embedded in institutions that are non or even pre capitalist. He shows how a toxic combination of financialization, corporate globalization and a deregulated and parasitic financial industry have led to structural economic stagnation in both the USA and the greater part of the EU.

DHS Financial Management United States. Congress. House. Committee on Homeland Security. Subcommittee on Oversight and Management Efficiency, 2014 *The Report: Mongolia 2014* Oxford Business Group, 2014-05-23 Since the country's transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation. Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors. Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years. The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures. Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

Credit Rating Governance Ahmed Naciri, 2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks. However factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues and proposes some potential solutions and improvements. This will be of interest to
