Grade 8 Math Makes Sense Textbook:

Math Makes Sense 8 [with Answers] Trevor Brown, 2005 *Math Makes Sense 8*, 2008 **Math Makes Sense** Lorraine Baron, 2008 *Math Makes Sense Eight* Trevor Brown, 2006 **Math Makes Sense 8**, 2007 *Reciprocal Learning for Cross-Cultural Mathematics Education* Sijia Cynthia Zhu, Shu Xie, Yunpeng Ma, Douglas McDougall, 2020-12-15

This edited volume examines new ways of teaching mathematics through a cross cultural reciprocal learning project between sister schools in Canada and China. Situating teacher learning in the intersection of the two different school systems, curriculums and cultures of mathematics learning and teaching in both nations, this volume offers teachers a unique and much needed perspective on how practices between countries become more and more likely shaped by each other in the emerging global society. Born out of a comparative study project sponsored by the SSHRC, this volume compiles five years worth of findings from reciprocal partnerships between researchers, teachers, school administrators and students from both nations. Through the process of reciprocal learning and narrative inquiry, the research described in these chapters illuminates the unknown and shares newly created mathematics education knowledge.

Rational Numbers to Linear Equations Hung-Hsi Wu, 2020-06-18. This is the first of three volumes that together give an exposition of the mathematics of grades 9-12 that is simultaneously mathematically correct and grade level appropriate. The volumes are consistent with CCSSM Common Core State Standards for Mathematics and aim at presenting the mathematics of K-12 as a totally transparent subject. The present volume begins with fractions, then rational numbers, then introductory geometry that can make sense of the slope of a line, then an explanation of the correct use of symbols that makes sense of variables, and finally a systematic treatment of linear equations that explains why the graph of a linear equation in two variables is a straight line and why the usual solution method for simultaneous linear equations by substitutions is correct. This book should be useful for current and future teachers of K-12 mathematics as well as for some high school students and for education professionals.
