Grade 8 Toronto Catholic District School Board:

Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

Perspectives on Transitions in Schooling and Instructional Practice Susan E. Elliott-Johns, Daniel H. Jarvis, 2013-12-06. *Perspectives on Transitions in Schooling and Instructional Practice* examines student transitions between major levels of schooling, teacher transitions in instructional practice, and the intersection of these two significant themes in education research. Twenty-six leading international experts offer meaningful insights on current pedagogical practices, obstacles to effective transitions, and proven strategies for stakeholders involved in supporting students in transition. The book is divided into four sections representing the four main transitions in formal schooling: Early Years (Home, Pre-school, and Kindergarten) to Early Elementary (Grades 1-3), Early Elementary to Late Elementary (Grades 4-8), Late Elementary to Secondary (Grades 9-12), and Secondary to Post-Secondary (College and University). A coda draws together overarching themes from throughout the text to provide recommendations and a visual model that captures their interactions. Combining theoretical approaches with practical examples of school-based initiatives, this book will appeal to those involved in supporting either the student experience, both academically and emotionally, or teacher professional learning and growth.

Conquering the Crowded Curriculum Kathleen Gould Lundy, 2015-10-31. Discover innovative ways to conquer the many curricular challenges in today's diverse classrooms. This practical book shows teachers how to work collaboratively to weave authentic learning tapestries where content, knowledge, and diverse understandings are drawn from one subject discipline and used to enrich others. It offers simple ways to build on the four principles of inquiry: innovation, identity, and integration to form a creative framework for delivering curriculum. The book introduces ten comprehensive planned projects that integrate curriculum areas and encourage students to see different perspectives, think critically, and imaginatively about ideas, work with new materials, and represent their knowledge in precise and profound ways. Based on Kathy Lundy's extensive classroom experience, this timely new book suggests meaningful ways for the entire education community to work together to deliver a curriculum that is relevant and engaging.
