Century this account of Japanese tourism explores both domestic social relations and international geographical political and economic relations especially in the northeast Asian context Socio cultural and geographical analysis form the research framework for the book in three ways first there is an emphasis on scale as tourism phenomena and their implications are discussed both in a global context and at the national regional and local levels second the discussion is informed by primary data sources such as censuses and surveys and third the incorporation of fieldwork and case studies adds concreteness to the overall picture of Japanese tourism This book is a significant addition to an area of study currently under represented in the literature Car ,1910 **Edith Wharton and Mary Roberts Rinehart at the Western Front, 1915** Ed

Klekowski,Libby Klekowski,2018-07-10 By 1915 the Western Front was a 450 mile line of trenches barbed wire and concrete bunkers stretching across Europe Attempts to break the stalemate were murderous and futile Censorship of the press was extreme no one wanted the carnage reported Remarkably the Allied command gave two intrepid American women Edith Wharton and Mary Roberts Rinehart permission to visit the front and report on what they saw Their travels are reconstructed from their own published accounts Rinehart s unpublished day by day notes and the writings of other journalists who toured the front in 1915 The present authors explorations of the places Wharton and Rinehart visited serves as a travel guide to the Western Front **The Triumph of Human Empire** Rosalind Williams,2022-12-22 In the early 1600s in a haunting tale titled New Atlantis Sir Francis Bacon imagined the discovery of an uncharted island This island was home to the descendants of the lost realm of Atlantis who had organized themselves to seek the knowledge of Causes and secret motions of things and the enlarging of the bounds of Human Empire to the effecting of all things possible Bacon s make believe island was not an empire in the usual sense marked by territorial control instead it was the center of a vast general expansion of human knowledge and power Rosalind Williams uses Bacon s island as a jumping off point to explore the overarching historical event of our time the rise and triumph of human empire the apotheosis of the modern ambition to increase knowledge and power in order to achieve world domination Confronting an intensely humanized world was a singular event of consciousness which Williams explores through the lives and works of three writers of the late nineteenth century Jules Verne William Morris and Robert Louis Stevenson As the century drew to a close these writers were unhappy with the direction in which their world seemed to be headed and worried that organized humanity would use knowledge and power for unworthy ends In response Williams shows each engaged in a lifelong quest to make a home in the midst of human empire to transcend it and most of all to understand it They accomplished this first by taking to the water in life and in art the transition from land to water offered them release from the condition of human domination At the same time each writer transformed his world by exploring the literary boundary between realism and romance Williams shows how Verne Morris and Stevenson experimented with romance and fantasy and how these traditions allowed them to express their growing awareness of the need for a new relationship between humans and Earth The Triumph of Human Empire shows that for these writers and their

readers romance was an exceptionally powerful way of grappling with the political technical and environmental situations of modernity As environmental consciousness rises in our time along with evidence that our seeming control over nature is pathological and unpredictable Williams s history is one that speaks very much to the present *Literary Digest* ,1920

Auto Motor Journal Stanley Spooner,1904 **Library of Congress Catalogs** Library of Congress,1980 **The Automobilist Abroad** Milburg F Mansfield,2024-02-05 We have progressed appreciably beyond the days of the old horseless carriage which it will be remembered retained even the dashboard To day the modern automobile somewhat resembles in its outlines across between a decapod locomotive and a steam fire engine or at least something concerning the artistic appearance of which the layman has very grave doubts The control of a restive horse a cranky boat or even a trolley car on rails is difficult enough for the inexperienced and there are many who would quail before making the attempt but to the novice in charge of an automobile some serious damage is likely enough to occur within an incredibly short space of time particularly if he does not take into account the tremendous force and power which he controls merely by the moving of a tiny lever or by the depressing of a pedal The Literary Digest ,1920
