Using Quality Benchmarks for Assessing and Developing Undergraduate Programs Dana S. Dunn, Maureen A. McCarthy, Suzanne C. Baker, Jane S. Halonen, 2010-12-21 Using Quality Benchmarks for Assessing and Developing Undergraduate Programs Using Quality Benchmarks for Assessing and Developing Undergraduate Programs introduces selected performance criteria benchmarks to assist undergraduate programs in defining their educational goals and documenting their effectiveness The book explores the attributes of undergraduate programs by focusing on educationally related activities in eight domains program climate assessment accountability and accreditation issues student learning outcomes student development curriculum faculty characteristics program resources and administrative support

Further it conceptualizes a continuum of performance for each attribute in each of the domains to characterize underdeveloped developing effective and distinguished achievement for undergraduate programs The goal of the book is to encourage individual departments at various types of institutions to evaluate what they currently do well while identifying areas for refinement or future growth When benchmarks reveal that a program is underdeveloped faculty and administrators can plan for how they can best direct subsequent efforts and resources to improve a program s performance and ability to serve students Emphasizing formative assessment over summative or punitive evaluation the benchmarks in this book are designed to improve program quality encourage more effective program reviews and help optimally functioning programs compete more successfully for resources Using performance benchmarks to identify areas of program strength can in turn be used to recruit and retain students seek funding via grants or alumni support and enhance the perceived rating of an institution

Interdisciplinary and Practical Approaches to Managerial Education and Training Carvalho, Luísa Cagica,Teixeira, Nuno,Pardal, Pedro,2022-03-25

In the last decades the development of innovative practices has gained considerable interest. New generations of students have grown up in a very different environment from their predecessors, one influenced by information and communications technology (ICT). In a globalized world, ICT is changing the way businesses create and capture value, how and where we work, and how we interact and communicate. Thus, some of the traditional teaching methods are rapidly becoming obsolete and unattractive to the new generation of students. Despite the increase in the development of new teaching approaches in recent years, relevant questions related to learning objectives, suitable methodologies, and impact assessment remain unanswered.

Interdisciplinary and Practical Approaches to Managerial Education and Training addresses the best practices, laboratory methods, policies, protocols, and practical approaches to managerial education and training. Covering a wide range of topics such as training programs, teacher education, and online learning, it is ideal for academics, university teachers, researchers, students, public and private institutions, and professionals in managerial training education.

How to Create a Culture of Achievement in Your School and Classroom Douglas Fisher, Nancy Frey, Ian Pumpian, 2012-04-26

What does it feel like to walk into your school? Is it a welcoming place where everyone feels valued? Most school improvement efforts focus on academic goals, instructional models, curriculum, and assessments. But sometimes what can make or break your learning community are the intangibles: the relationships, identity, and connections that make up its culture. Authors Fisher, Frey, and Pumpian believe that no school improvement effort will be effective unless school culture is addressed. They identify five pillars that are critical to building a culture of achievement:

1. Welcome: Imagine if all staff members in your school considered it their job to make every student, parent, and visitor feel noticed, welcomed, and valued.
2. Do no harm: Your school rules should be tools for teaching students to become the moral and ethical citizens you expect them to be.
3. Choice words: When the language students hear helps them tell a story about themselves that is one of possibility and potential, students perform in ways that are consistent with that belief.
4. It's never too late to learn: Can you push students to go beyond the minimum needed to get by to discover what they are capable of achieving?
5. Best school in the universe: Is your school the best place to teach and learn? The best place to work?

Drawing on their years of experience in the classroom, the authors explain how these pillars support good teaching and learning. In addition, they provide 19 action research tools that will help you create a culture of achievement so that your school or classroom is the best it can be. After reading this book, you'll see why culture makes the difference between a school that enables success for all students and a school that merely houses those students during the school day.
