pleasure to be good there need to be reasons for us to desire and pursue it Likewise for liberty and equality to be values there have to be reasons for us to promote and preserve them Extensive discussion has focussed on some of the problems that the buck passing account faces such as the wrong kind of reason problem Less attention however has been paid as to why we should accept the buck passing account or what the theoretical pay offs and other implications of accepting it are The Normative and the Evaluative provides the first comprehensive motivation and defence of the buck passing account of value Rach Cosker Rowland argues that the buck passing account explains several important features of the relationship between reasons and value as well as the relationship between the different varieties of value in a way that its competitors do not She shows that alternatives to the buck passing account are inconsistent with important views in normative ethics uninformative and at odds with the way in which we should see practical and epistemic normativity as related In addition she extends the buck passing account to provide an account of moral properties as well as all other normative and deontic properties and concepts such as fittingness and ought in terms of reasons *Naliboki Forest: Land, Wildlife and Human. 2nd edition* Vadim Sidorovich, 2020-11-01 This scientific popular book gives a detailed information about the terrain of Naliboki Forest which include the relief forming climate geobotanic data analysis of flora and description of the plant communities maps and geographical names invertebrate animal species list and the gained knowledges on population ecology of vertebrate animal species as well as historical outline and ethnographical sketch It is a second edition of the Naliboki Forest book that was firstly published in 2016 In the new edition of the book some new text and a lot of new photo information about the forest massif have been added as well some improvements of its first edition have been done
