Goldstein,1998 Do It Yourself investigates the history behind the current do it yourself craze in homebuilding and home repair The origins of home improvement can be traced to the early part of the century when government loan programs placed home ownership within the reach of growing numbers of families mass circulation magazines began providing their readers with information about home remodeling and repair and increasing numbers of Americans turned to the manual arts and handicrafts as leisure time pursuits World War II provided many Americans with the skills and confidence to undertake home improvement projects on their own and after the war changes in the manufacturing and retail of tools and equipment created new possibilities for transforming one s home As home remodeling became a central feature of domestic life and consumer culture the do it yourself movement was born coming of age in the baby boomer 1950s and 1960s when Americans created suburban paradises and reclaimed decaying urban centers The text of Do It Yourself which investigates topics ranging from women s roles in home repair to historic preservation is a lively mix of illustrations including period photographs magazine spreads and advertisements and clearly written analysis of the trends behind these images

Understanding Police Interrogation William Douglas Woody,Krista D. Forrest,2020-03-03 Uses techniques from

psychological science and legal theory to explore police interrogation in the United States Understanding Police Interrogation provides a single comprehensive source for understanding issues relating to police interrogation and confession It sheds light on the range of factors that may influence the outcome of the interrogation of a suspect which ones make it more likely that a person will confess and which may also inadvertently lead to false confessions There is a significant psychological component to police interrogations as interrogators may try to build rapport with the suspect or trick them into thinking there is evidence against them that does not exist Also important is the extent to which the interrogator is convinced of the suspect s guilt a factor that has clear ramifications for today s debates over treatment of black suspects and other people of color in the criminal justice system The volume employs a totality of the circumstances approach arguing that a number of integrated factors such as the characteristics of the suspect the characteristics of the interrogators interrogation techniques and location community perceptions of law enforcement and expectations for jurors and judges all contribute to the nature of interrogations and the outcomes and perceptions of the criminal justice system The authors argue that by drawing on this approach we can better explain the likelihood of interrogation outcomes including true and false confessions and provide both scholars and practitioners with a greater understanding of best practices going forward
