*A Citizen's Guide to American Foreign Policy* David Patrick Houghton, 2013-11-20 American foreign policy often looks like a trail of man made debris and disaster Of course the explanations for many poorly made decisions are rather complex In this brief and cogent analysis Houghton shows us that understanding American foreign policy often comes down to recognizing the cognitive limitations of the decision makers which affects the foreign policy process Then there is the nature of the decisions themselves Quite a few decisions in American foreign policy involve tragic choices where leaders are effectively confronted with a series of progressively bad or uncomfortable options And it is equally clear that some policies are not the product of any one individual's preferences but emerge as a consequence of the way in which complex modern governments with large bureaucracies operate Written with the interested layperson in mind as well as students of international affairs this Citizen's Guide to American Foreign Policy asks questions like Why do presidents so often do things which seem to be directly against the national interests of the United States not just in retrospect but even at the time Why do there seem to be so many fiascoes in US foreign policy Why does Congress sometimes tie the hands of the president in foreign affairs Why do presidents seem to respond more to opinion polls or to what's on CNN and Fox News than they do to the core interests of the United States Houghton's overview helps us see past the partisan in fighting that too often obscures the central issues in foreign affairs This is vital required reading for all readers who wish to better understand America's involvement in the world

Just Babies Paul Bloom,2014-11-11 A leading cognitive scientist argues that a deep sense of good and evil is bred in the bone From John Locke to Sigmund Freud philosophers and psychologists have long believed that we begin life as blank moral slates Many of us take for granted that babies are born selfish and that it is the role of society and especially parents to transform them from little sociopaths into civilized beings In Just Babies Paul Bloom argues that humans are in fact hardwired with a sense of morality Drawing on groundbreaking research at Yale Bloom demonstrates that even before they can speak or walk babies judge the goodness and badness of others actions feel empathy and compassion act to soothe those in distress and have a rudimentary sense of justice Still this innate morality is limited sometimes tragically We are naturally hostile to strangers prone to parochialism and bigotry Bringing together insights from psychology behavioral economics evolutionary biology and philosophy Bloom explores how we have come to surpass these limitations Along the way he examines the morality of chimpanzees violent psychopaths religious extremists and Ivy League professors and explores our often puzzling moral feelings about sex politics religion and race In his analysis of the morality of children and adults Bloom rejects the fashionable view that our moral decisions are driven mainly by gut feelings and unconscious biases Just as reason has driven our great scientific discoveries he argues it is reason and deliberation that makes possible

our moral discoveries such as the wrongness of slavery Ultimately it is through our imagination our compassion and our uniquely human capacity for rational thought that we can transcend the primitive sense of morality we were born with becoming more than just babies Paul Bloom has a gift for bringing abstract ideas to life moving seamlessly from Darwin Herodotus and Adam Smith to The Princess Bride Hannibal Lecter and Louis C K Vivid witty and intellectually probing Just Babies offers a radical new perspective on our moral lives **National Geographic** ,2005 *Explaining Politics* Oliver Woshinsky,2008-03-04 This unique text offers a comprehensive overview of who participates in politics and why how social and political institutions shape that involvement and ultimately what form citizen political participation takes Drawing on a multitude of factors to explain politics and political behaviour Woshinsky shows that political outcomes depend on a complex interplay between individuals and their environment Psychology personality and ideology together with culture institutions and social context shape political behaviour Explaining Politics offers a wealth of comparative examples and practical applications through a lively and engaging narrative
