Grenough, 2024-09-03 The Canon 6D is the smallest and lightest full frame DSLR in the world. The image quality is extraordinary and it can even take an exposure in brightly lit night street scenes. It is my go to camera for landscape and architectural photography. It has the Canon 5D classic film look to its photographs. I know an individual who has used this camera in taking more than 1 million wedding photographs. It has a reputation as a brilliant camera and is widely used to produce high end astrophotography. This camera is a game changer. If you are in the market for a DSLR this book is a must read as it will introduce you to the amazing aspects of this world renowned camera as well as introduce you to landscape photography architectural photography night photography and astronomical photography. Also of note the Canon 6D uses a Baader filter which converts the Canon 6D into a full spectrum camera which allows light through all the frequencies of a standard DSLR but boasts additional sensitivities to the red end of the spectrum and 656 nm H Alpha wavelength. Therefore this Canon EOS 6D is fantastic gear for low light capabilities and for those involved in night photography. Promoting Healthy and Supportive Acoustic

Environments: Going beyond the Quietness Francesco Aletta, Jian Kang, 2020-11-04 This book gathers 14 original contributions published in an IJERPH Special Issue that deal with the perception of environmental sounds and how such

sounds are likely to affect human quality of life and well being and the experience of a place The research focus over the years has been gradually shifting from treating sound simply as noise and something that cities should get rid of to a potential resource to promote and support community life in public spaces Three main topics or needs to be addressed by researchers and practitioners emerged from this Special Issue 1 the need to re think quietness in cities as something that goes beyond the mere pursuit of silence 2 the need to integrate additional contextual factors in the characterization and management of urban acoustic environments for public health and 3 the need to consider the acoustic quality of indoor spaces as opposed to an outdoor only perspective The contributions collected in this book will hopefully trigger new questions and inform the agenda of future researchers and practitioners in the environmental acoustics domain **Digital**

Some photographers make portraits that we can't take our eyes off of. These images create mood, evoke emotion, and pique our curiosity. They have that certain something that other portraits seem to lack. These rare images are memorable, the kind of shots that clients want and photographers strive to emulate. These portraits are technically precise and have style. Neil van Niekerk is a big name in the portrait and wedding photography industry. His masterful photographs get a reaction, and he's devoted to helping others create compelling portraits for their clients. In this book, van Niekerk shows readers strategies for creating a wide range of portrait looks: romantic, fun, sweet, dramatic, glamorous, or moody. In lackluster, middle-of-nowhere locales, small home studios, big expanses, and even on rooftops. Starting with traditional lighting and posing strategies and moving through spicier varieties, he shows readers how integrating specialized lighting (rim lighting, backlighting, flare, and low key lighting), using natural light and artificial sources, and compositional approaches (shallow depth of field, lens compression, and unorthodox perspectives) into their creative approach can allow them to take full creative control over their portrait taking process so that they're able to deliver incredible shots of their clients in any photographic conditions.
