The Trouble with Passion Erin Cech, 2021-11-09 Probing the ominous side of career advice to follow your passion this data driven study explains how the passion principle fails us and perpetuates inequality by class gender and race and it suggests how we can reconfigure our relationships to paid work Follow your passion is a popular mantra for career decision making in the United States Passion seeking seems like a promising path for avoiding the potential drudgery of a life of paid work but this passion principle seductive as it is does not universally translate The Trouble with Passion reveals the significant downside of the passion principle the concept helps culturally legitimize and reproduce an exploited overworked white collar labor force and broadly serves to reinforce class race and gender segregation and inequality Grounding her investigation in the paradoxical tensions between capitalism s demand for ideal workers and our cultural expectations for self expression sociologist Erin A Cech draws on interviews that follow students from college into the workforce surveys of US workers and experimental data to explain why the passion principle is such an attractive if deceptive career decision making mantra particularly for the college educated Passion seeking presumes middle class safety nets and springboards and penalizes first generation and working class young adults who seek passion without them The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility The passion principle also feeds into a culture of overwork encouraging white collar workers to tolerate precarious employment and gladly sacrifice time money and leisure for work they are passionate about And potential employers covet but won t compensate passion among job applicants This book asks What does it take to center passion in career decisions Who gets ahead and who gets left behind by passion seeking The Trouble with Passion calls for citizens educators college administrators and industry leaders to reconsider how we think about good jobs and by extension good lives
