**Dialogical Inquiry in Mathematics Teaching and Learning** Nadia Stoyanova, Eva Marsal, 2023-10-31 The collection of papers in this anthology represents what may be a broad exploration of the role of philosophical inquiry in the classroom and in mathematics teacher education a topos characterized by multiple intersecting themes all of which converge on a central question what is the role of mathematics in the construction of the realities we live by and could that role be different if we became aware of its invisible power In the age of the Anthropocene an era in which technological intervention plays an ever more central role in the way we build develop and attempt to maintain our increasingly fragile and risk prone human and natural world what are the implications of the hegemonic epistemic status of mathematics in those processes Does mathematics define the conditions of possibility of all knowledge whether expressed in a theory or silently invested in a practice Does or can mathematics and its presumed value neutrality serve to limit constrain suppress and even preclude other perhaps more valuable forms of knowledge Alternatively can philosophical dialogue about mathematics serve to clarify unmask reframe and recreate our understanding of mathematics and its symbolic power in the human and material world and act as an emancipatory form of knowledge in culture and society What would such dialogues look like in the mathematics classroom The papers in this volume address these questions in various contexts and registers and provide prospective and in service teachers with compelling and suggestive ways of responding to them A must read for math educators everywhere Nadia Stoyanova Kennedy Associate Professor of Mathematics Education City University of New York USA Eva Marsal Professor of Philosophy University of Education Karlsruhe Germany University of Warsaw Poland

*Theory and Practice of Dialogical Community Development* Peter Westoby, Gerard Dowling,2013-07-18 This book proposes that community development has been increasingly influenced and co opted by a modernist soulless rational philosophy reducing it to a shallow technique for solving community problems In contrast this dialogical approach re maps the ground of community development practice within a frame of ideas such as dialogue hospitality and depth For the first time community development practitioners are provided with an accessible understanding of dialogue and its relevance to their practice exploring the contributions of internationally significant thinkers such as P Freire M Buber D Bohm and H G Gadamer J Derrida G Esteva and R Sennett What makes the book distinctive is that first it identifies a dialogical tradition of community development and considers how such a tradition shapes practice within contemporary contexts and concerns economic social political cultural and ecological Second the book contrasts such an approach with technical and instrumental approaches to development that fail to take complex systems seriously Third the approach links theory to practice through a combination of storytelling and theory
