The main window displays the 'Liquid Properties' tab for a user-defined fluid. A table lists various properties with their values and units. Below the table, a note states: 'For a user-defined component in a two-phase fluid, surface tension is recommended input. The program will estimate a value if a value is not specified, but the estimated value may not be accurate for your fluid.'

For a user-defined component in a two-phase fluid, surface tension is recommended input. The program will estimate a value if a value is not specified, but the estimated value may not be accurate for your fluid.
