GENDER ISSUES AMITA SAXENA,2019-08-21

Gender inequality and discrimination not only in India all over world is a multifaceted issue that has been related to both men and women Some people think gender equality indices place men at a disadvantage when India s population is surveyed women are found to be at disadvantage in several ways These trends are disturbing as a natural prediction would be that with growth comes education and prosperity the dowry system involving a cash or in kind payment from the bride s family to the grooms at the time of marriage is another institution that disempowered women It reinforces the inferior status of Indian women and puts them at risk of violence in their marital households The normalization of intra household violence is a huge detriment to the welfare of women Crimes against women have doubled Gender inequality extends across various facets of society Political

participation is a key factor to rectify this situation Gender bias extends to electoral politics and their representative also The book deals with Population Stabilizing Measure Juvenile Delinquency Gender Based Violence Women Fish Retailers Gender Inequality Geriatric Issues in Women and their Management in India Women s Attitude And The Environment The Journey of Indian Women across ages Gender Discrimination in the Workplace Violence Against Women dowry system Women s Role in Developing Technology Increasing Productivity Improving Lives Gender Budgeting Trafficking of women for Sexual Exploitation and Women In Politics

Gender-Based Violence and Layered Disasters Nahid Rezwana, Rachel Pain, 2022-12-30 This book investigates the widespread and persistent

relationship between disasters and gender based violence drawing on new research with victim survivors to show how the two forms of harm constitute layered disasters in particular places intensifying and reproducing one another The evidence is now overwhelming that disasters and gender based violence are closely connected not just in moments of crisis but in the years that follow as the social economic and environmental impacts of disasters play out This book addresses two key gaps in research First it examines what causes the relationship between disasters and gender based violence to be so widespread and so enduring Second it highlights victim survivors own accounts of gender based violence and disasters It does so by presenting findings from original research on cyclones and flooding in Bangladesh and the UK and a review of global evidence on the Covid 19 pandemic Drawing on feminist theories it conceptualises the coincidence of gender based violence disasters and other aggravating factors in particular places as layered disasters Taking an intersectional approach that emphasises the connections between culture place patriarchy racism poverty settler colonialism environmental degradation and climate change the authors show the significance of gender based violence in creating vulnerability to future disasters Forefronting victim survivors experiences and understandings the book explores the important role of trauma and how those affected go about the process of survival and recovery Understanding disasters as layered casts light on why tackling gender based violence must be a key priority in disaster planning management and recovery The book concludes by exploring critiques of existing formal responses which often ignore or underplay gender based violence The book will be of interest to all those interested in understanding the causes and impacts of disasters as well as scholars and researchers of gender and gender based violence
