There is also thought to be a causal link between smoking and cancer susceptibility. An epidemiological study has revealed a causal relation between smoking and susceptibility to lung cancer among individuals with the HLA-DQB1*0601 allele, while no relation was observed in non-carriers. This is the first time that a genetic polymorphism has been shown to be associated with cancer risk.

These two million years of "fun" will reflect several trends in adult learning to come: the use of digital devices, often used with multiple people; movement; movement that makes the participants very comfortable; and movement that will be about 10-15% fun.
