Humanity Against Itself The Retreat From Reason:

Humanity Against Itself Benjamin Kovitz, M.D., 2012-04-30 In this broad overview of humanity's predicament psychiatrist Benjamin Kovitz illustrates the parallels between anxiety in the individual and discord in civilization as a whole Kovitz emphasizes that civilization rests upon the precarious foundation of human nature with its age old tendencies toward self deception violence and pursuit of power He argues that resistance to facing our hidden motives is what lies at the core of political and religious strife as well as individual anxiety At the heart of the book is an illuminating chapter on the meaning of anxiety explaining with clarity and detail how the pathology arises how it is expressed and how it can be relieved The complexities of the condition are portrayed in vivid clinical examples often using the patients own words Kovitz takes issue with the current practice of relying solely on psychiatric medication without addressing the patient's understanding of what his or her symptoms mean On the societal level Kovitz shows how evasion of reality complicates our efforts at progress and peaceful coexistence despite the advances of science and democracy and how defensive behavior among nations can culminate in war Turning to religion Kovitz explores the psychological underpinnings of our need for religion and briefly summarizes the major world faiths with an eye to their underlying attitudes and assumptions While pointing out the contradictions inherent in a literal approach to religious dogma the author appreciates the need for faith that transcends logic In a psychiatric evaluation of the life of Saint Teresa of Avila Kovitz recognizes pathological anxiety yet respects the therapeutic value of her religious visions Writing with eloquence while avoiding psychological jargon Kovitz elucidates our human dilemmas with a clarity and depth that can help us move toward sanity in an unpredictable and troubled world

Self-Construction and the Formation of Human Values Teodros Kiros, 2001-01-30 This volume presents a theoretical defense of the potential of ordinary individuals to construct values and through them to become self empowering responsible participants in a democratic community Rather than conceiving of power as domination the author identifies true power as self empowerment a notion based on self construction He proposes the vision of an authentically free self filled with a compassion that is a composite of reason and feeling Such a composite self does not consciously manipulate language truth and desire to dominate and subordinate other individuals but uses them to construct values and norms that can enrich others To support his argument the author draws on both classical and contemporary philosophers as well as on literary sources

The War Against Marxism Tony McKenna, 2021-05-06 Marxism has provided the ideological impetus to liberation movements radical struggles and revolutions across the world But in the 20th century the emancipatory and democratic power of its thought has often been distorted and overridden by various Stalinist dictatorships which claimed to be acting in its name A similar undermining of freedom of thought has been accomplished at an intellectual level various schools have transformed Marxist thought in line with some of the most fashionable but gentrified forms of contemporary philosophy shifting the focus from the democratic power of the masses and their ability to challenge the capitalist order to concentrate

on superstar thinkers and elite theories The War Against Marxism traces the war against Marxism which paradoxically has been conducted in the name of Marxism itself As such it provides a fiery philosophical and polemical indictment of so called Marxists such as Adorno Horkheimer Althusser Jameson Eagleton Mouffe Laclau and Zizek and asks what can be done to stem this counterrevolution Philosophy, Literature and the Human Good Michael Weston,2003-09-02 In this provocative new examination of the philosophical moral and religious significance of literature Michael Weston explores the role of literature in both analytic and continental traditions He initiates a dialogue between them and investigates the growing importance of these issues for major contemporary thinkers Each chapter explores a philosopher or literary figure who has written on the relation between literature and the good life such as Derrida Kierkegaard Murdoch and Blanchot Challenging and insightful Philosophy Literature and the Human Good is ideal for all students of philosophy and literature Human Rights and Personal Self-defense in International Law Jan Arno Hessbruegge,2017 While an abundance of literature covers the right of states to defend themselves against external aggression this is the first book dedicated to the right to personal self defense in international law Dr Hessbruegge sets out in careful detail the strict requirements that human rights impose on defensive force by law enforcement authorities especially police killings in self defense The book also discusses the exceptional application of the right to personal self defense in military led operations notably to contain violent civilians who do not directly participate in hostilities The author establishes that international law gives individuals the right to forcibly resist human rights violations that pose a serious risk of significant and irreparable harm At the same time he calls into question prevailing state practice which fails to recognize any collective right to organized armed resistance even when it constitutes the last resort to defend against genocide or other mass atrocities **A treatise on self-knowledge, by J. Mason. The economy of human life, by R. Dodsley. The great importance of a religious life considered, by W. Melmoth. To which is prefixed, a biographical preface** John Mason,1830 **Nietzsche and German Philosophy** Otfried Höffe,2021-02-18 A collection of newly translated essays representing the finest post war German scholarship on Nietzsche *The Unity of Theology* Theodore James Whapham,2017-11-01 Wolfhart Pannenberg is among the most important Protestant Continental theologians of the twentieth century This volume offers the first full historical and thematic survey of Pannenberg s corpus from his early work in Christology and eschatology to his writings on science anthropology theology and the university and the pivotal achievement of his systematic theology As such the project will make a significant contribution to theological assessment and will be a useful text for students and scholars in modern and contemporary theology **Against Apocalypse** Fred Dallmayr,2015-12-24 The book denounces the irresponsible recklessness of some geopolitical agendas which are pushing the world relentlessly toward a major global war and possibly toward nuclear destruction or apocalypse The Bulletin of Atomic Scientists has recently placed the Doomsday Clock at three minutes to midnight Signs pointing toward a possible grand disaster are multiple everywhere one looks in our world today one finds

ethnic and religious conflicts bloody mayhem incipient genocide proxy wars and hybrid wars renewal of the Cold War Add to these ills global economic crises massive streams of refugees and the threats posed by global warming and the picture of a world in complete disorder is complete Thus it is high time for humankind to wake up Starting from the portrayal of global anomie the book issues a call to people everywhere to oppose the rush to destruction and to return to political sanity and the quest for peace This is a call to global public responsibility In ethical terms it says that people everywhere have an obligation to prevent apocalypse and to maintain our world or hold the world together in all its dimensions including the dimensions of human and social life natural ecology and human spiritual aspirations or openness to the divine Differently out in lieu of the prevailing disorder and brokenness the book urges us to search for a new wholeness and just peace The book is intercultural and also inter disciplinary Since the aim is holistic to hold the world together the book necessarily has to draw on many disciplines including philosophy theology social science history and literature In terms of Western philosophical and intellectual legacies it draws mainly on the teachings of Nietzsche Heidegger and Derrida It also offers a completely new interpretation of the work of Thomas Hobbes unearthing in this work an ethical demand to exit from the state of perpetual warfare in the direction of a shared commonwealth The text also relies on the teachings of Christian theology both Catholic and Protestant invoking at crucial junctures the works of Karl Barth Raimon Panikkar and others In terms of non Western intellectual and spiritual legacies the book offers new interpretations of leading texts in the Indian and Chinese traditions Thus emphasis is placed on the ideas of world maintenance loka samgraha in Hinduism and of All Under Heaven in classical Chinese thought Although a central thrust of the text is for a new wholeness the goal is not a uniform synthesis where everything would be swallowed up in a bland unity Rather the issue is how to preserve diversity of the world in its rightful integrity by linking all elements in a complex web of interconnections and relationality

The Rebellious No Noëlle Vahanian, 2014-03-03

This book aims to renew theological thinking by extending and radicalizing an iconoclastic and existentialist mode of thought It proposes a theology whose point of departure assumes and accepts the critiques of religion launched by Nietzsche Freud Marx and Feuerbach but nevertheless takes theological desire seriously as a rebellious force working within but against an anthropomorphic phallogocentric worldview As a theology of language it does not claim any privileged access to some transcendent divine essence or ground of Being On the contrary for Noëlle Vahanian theology is a strictly secular discourse like any other discourse but aware of its limitations and wary of great promises its own included Its faith is that this secular theological desire can be a force against the constitutive indifference of thought and it is a meditative act of rebellion Aphoristic instead of argumentative this book offers an original and constructive engagement with such seminal issues as indifference belief madness and love
