Measured Language Jeffrey Connor-Linton,Luke Wander Amoroso,2014-02-28 Measured Language presents studies using forms of measurement and quantitative analysis current in diverse areas of linguistic research from language assessment to language change from generative linguistics to experimental psycholinguistics and from longitudinal studies to classroom research Contextualizing English for Academic Purposes in Higher Education Ian Bruce,Bee Bond,2022-07-28 This book highlights the centrality of political and ideological issues as they relate to the positioning and practice of English for Academic Purposes EAP demonstrating that EAP cannot flourish as a profession or a discipline without an awareness of the macro and meso level political shifts that impact the wider university The volume states that the practices of EAP are in fact political acts and examines these as yet unexplored power dynamics

The volume begins by considering key influences that have shaped universities and their governance and management over the last three decades and how these relate to the role and practice of EAP. These influences include neoliberal economic policies, governmental demands for widening participation, globalization, entrepreneurial approaches to higher education, students as clients, and therapeutism in universities. Following consideration of these broader contextual issues, specific chapters focus on politics and policies surrounding the recruitment and participation of international fee-paying students, their positioning and identity within English medium universities, including issues relating to English language standards and academic integrity. Further chapters then consider more local influences that shape EAP programmes, such as their strategic roles within universities, their management, their teaching, and wider academic impact.
