The Handbook of Lighting Surveys and Audits John L. Fethers,1997-12-29 Complete with checklists and forms this step by step guide tells everything the facilities management professional needs to know about conducting lighting surveys and audits in a commercial or industrial facility Lighting audits are required when companies undertake lighting retrofits and related projects in order to improve their lighting systems The best way to ensure maximum performance of the new systems maximize return on investment and prove energy savings in order to qualify for financial assistance or meet government targets is to start with a comprehensive lighting audit Public and private incentives along with recent energy saving advances in lighting technology have motivated companies to turn to energy saving solutions Written by one of the nation s leading authorities on lighting and the education of lighting professionals this practical handbook provides the auditor with the solid useful information needed to accomplish accurate surveys and audits *Assessment of Solid-State Lighting, Phase Two* National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Assessment of Solid-State Lighting, Phase 2,2017-06-11 The standard

incandescent light bulb which still works mainly as Thomas Edison invented it converts more than 90% of the consumed electricity into heat Given the availability of newer lighting technologies that convert a greater percentage of electricity into useful light there is potential to decrease the amount of energy used for lighting in both commercial and residential applications Although technologies such as compact fluorescent lamps CFLs have emerged in the past few decades and will help achieve the goal of increased energy efficiency solid state lighting SSL stands to play a large role in dramatically decreasing U S energy consumption for lighting Since the publication of the 2013 National Research Council report Assessment of Advanced Solid State Lighting the penetration of SSL has increased dramatically with a resulting savings in energy and costs that were foreshadowed by that study What was not anticipated then is the dramatic dislocation and restructuring of the SSL marketplace as cost reductions for light emitting diode LED components reduced profitability for LED manufacturers At the same time there has been the emergence of new applications for SSL which have the potential to create new markets and commercial opportunities for the SSL industry Assessment of Solid State Lighting Phase Two discusses these aspects of change highlighting the progress of commercialization and acceptance of SSL and reviewing the technical advances and challenges in achieving higher efficacy for LEDs and organic light emitting diodes This report will also discuss the recent trends in SSL manufacturing and opportunities for new applications and describe the role played by the Department of Energy DOE Lighting Program in the development of SSL
