James Lovelock Explains Gaia Hypothesis On The Sacred:

Gaia's Sacred Chakras Margaret Bertulli, 2004 This work is a personal exploration of seven ancient sites as sacred heritage and the relation of each one to one of the seven major chakras In travelling to a sacred place one discovers the site's spiritual power within its actual setting Each site is related to a specific chakra on the basis of the author's experience there and the symbolism and concept associated with the chakra Each chapter begins with an original poem and ends with a guided meditation

The Celtic Holy Grail Quest David Stocks, **An Encyclopedia of Shamanism Volume 1** Christina Pratt, 2007-08-01 Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development

Sacred Gaia Anne Primavesi, 2002-09-11 Gaia the scientific theory founded by James Lovelock in 1979 embraces the earth as a whole dynamic entity whose sum is always larger than its parts While science and theology are often seen as contraries which negate or dilute one another Gaia theory harmonizes both systems of thought Sacred Gaia cogently describes Gaia theory's analysis of human and earthly evolution Anne Primavesi's remarkably effortlessly coherent book helps us to recognize the sacredness of our origins and our responsibility for the future

Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

The Science of the Craft William H. Keith, 2005 Advancements in science have taken us further and further from the tangibles our ancestors used to define and understand their world science has attempted to draw a careful line between what can be proven and what cannot But a revolution is at hand Keith explains how a fresh look at quantum physics supports phenomena that have long been ridiculed or ignored by classical science In engaging and frank prose Keith argues that magic is governed by laws similar to those that define scientific principles This is a truly fascinating gateway for exploring psychic phenomena

The Revenge of Gaia James Lovelock, 2007-08-02 In The Revenge of Gaia bestselling author James Lovelock father of climate studies and originator of the influential Gaia theory which views the entire earth as a living meta organism provides a definitive look at our imminent global crisis In this disturbing new book Lovelock guides us toward a hard reality soon we may not be able to alter the oncoming climate crisis Lovelock's influential Gaia theory one of the building blocks of modern climate science conceives of the Earth including the

atmosphere oceans biosphere and upper layers of rock as a single living super organism regulating its internal environment much as an animal regulates its body temperature and chemical balance But now says Lovelock that organism is sick It is running a fever born of the combination of a sun whose intensity is slowly growing over millions of years and an atmosphere whose greenhouse gases have recently spiked due to human activity Earth will adjust to these stresses but on time scales measured in the hundreds of millennia It is already too late Lovelock says to prevent the global climate from flipping into an entirely new equilibrium state that will leave the tropics uninhabitable and force migration to the poles The Revenge of Gaia explains the stress the planetary system is under and how humans are contributing to it what the consequences will be and what humanity must do to rescue itself
