developments especially in the Peruvian Andes The following chapters analyze spatial transformations mining development has prompted focusing on four axes access to space production mobility and representations of space A comprehensive narrative is constructed drawing on diverse voices and perspectives including those of family heads and their partners local leaders company employees and social scientists The book concludes by discussing how the findings challenge some of the current accounts of the social effects of mining development on rural communities and pose significant implications for sustainable development programs and place based practices By taking an interdisciplinary approach this book will appeal to a wide audience including geographers social anthropologists and social scientists interested in the social effects of mining as well as researchers interested in current Latin American Studies and Rural Development
