Prof. Jun Yeh, Tallinn University of Technology, Estonia, 2014-07-07 amount of new knowledge every day We have to acknowledge that even the smartest people among us are incapable of familiarizing himself with all these new data Fortunately we are only required to deal with a very small amount of that vast number in our work and life As those who devote himself to the field of information technology and management engineering I sincerely believe that it is our responsibility to make efforts to accelerate the advance of science in such fields

The 2014 international Conference on Information Technology and Management Engineering thanks to the hard work of its committee will be held on April 26 and 27 in Hong Kong The ITME2014 covers a wide range of topics such as network protocols information theory and coding theory network security management theory project management public management knowledge management etc It is a great honor to us that numerous people from various countries including many famous experts and excellent researchers have shown their interest in this convention and submitted their latest studies to us as their support Among these studies we have selected about a hundred to be finally included in this proceeding after reviewing and discussing We believe that this collection of work will be of great value not only to the participants of ITME2014 but also to those who has a chance of meeting it The publication of this conference proceedings and the successful opening of ITME2014 owe its credit to a lot of people and institutions especially the ITME2014 committee the editors and DEStech Publications The committee has devoted much time to reviewing the papers submitted to ITME2014 and DEStech Publications publishing those accepted papers I would like to thank the committee and the press deeply here for their support to ITME2014 and I am eagerly looking forward to another chance for us to be a team again Finally let s wish together that the 2014 International Conference on Information Technology

**CNC Machining Technology** Graham T. Smith, 2013-11-27 The first part of Volume I outlines the origins and development of CNC machine tools It explains the construction of the equipment and also discusses the various elements necessary to ensure high quality of production The second part considers how a company justifies the purchase of either cells or systems and illustrates why simulation exercises are essential prior to a full implementation Communication protocols as well as networking topologies are examined Finally the important high speed machining developments and the drive towards ultra high precision are mentioned Following a brief historical introduction to cutting tool development chapters 1 and 2 of Volume II explain why CNC requires a change in cutting tool technology from conventional methods A presentation is given of the working knowledge of cutting tools and cutting fluids which is needed to make optimal use of the productive capacity of CNC machines Since an important consideration for any machine tool is how one can locate and restrain the workpiece in the correct orientation and with the minimum of set up time chapter 3 is concerned with workholding technology Volume III deals with CNC programming It has been written in conjunction with a major European supplier of controllers in order to give the reader a more consistent and in depth understanding of the logic used to program such machines It explains how why and where to program specific features of a part and how to build them up into complete programs Thus the reader will learn about the main aspects of the logical structure and compilation of a program Finally there is a brief review of some of the typical controllers currently available from both universal and proprietary builders
