Motor Record, 1919 **The Consumer Response to Gasoline Price Changes** Kenneth Thomas Gillingham, 2011

When gasoline prices rise people notice the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden Yet raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency improving policies we could implement in the transportation sector This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices both on the intensive margin i e how much to drive and the extensive margin i e what vehicles to buy I assemble a unique and extremely rich vehicle level dataset that includes all new vehicle registrations in California 2001 to 2009 and all of the mandatory smog check program odometer readings for 2002 to 2009 The full dataset exceeds 49 million observations Using this dataset I quantify the responsiveness to gasoline price changes on both margins as well as the heterogeneity in the responsiveness I develop a novel structural model of vehicle choice and subsequent utilization where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving This utility consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies including gasoline taxes and feebates I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions with more responsiveness than in many recent studies in the literature I estimate a medium run i e roughly two year elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard I estimate a medium run elasticity of driving with respect to the price of gasoline around 0.15 for new personal vehicles in the first six years Older vehicles are driven much less but tend to be more responsive with an elasticity of roughly 0.3 I find that the vehicle level responsiveness in driving to gasoline price changes varies by vehicle class income geographic and demographic groups I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero implying a greater responsiveness than the true responsiveness This is an important methodological point for much of the literature estimating similar elasticities ignores these two issues These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions but is a relatively non distortionary policy instrument to raise revenue When the externalities of driving are considered an increased gasoline tax may not only be relatively non distortionary but even

economic efficiency improving However I find that the welfare changes from an increased gasoline tax vary significantly across counties in California an important consideration for the political feasibility of the policy Finally I find suggestive evidence that the rebound effect of a policy that works only on the extensive margin such as a feebate or CAFE standards may be closer to zero than the elasticity of driving with respect to the price of gasoline This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin

Zoroastrianism in India and Iran Alexandra Buhler, 2024-09-19 In the nineteenth century a number of Zoroastrians emigrated from Iran to India The subsequent importance of the cultural religious and political ties between the Zoroastrian communities of Iran and the Zoroastrian communities of India has long been recognised But despite this there has been little scholarly attention paid to the changing dynamics of this transnational relationship This book examines the Zoroastrian community in the late Qajar and early Pahlavi period beyond the borders of Iran to trace this Parsi Persian relationship A major theme is the increase in philanthropy directed to the Zoroastrians of Iran by the Parsis and the involvement of the British in encouraging Parsi feelings of patriotism towards Iran The book shows that not only were Parsis affected by events taking place in Iran they also contributed to the broader change in attitudes towards Zoroastrians in that country Using a variety of original sources from Britain India and Iran Alexandra Buhler looks at the political legal and social position of Zoroastrians in Iran and how different events impacted their attitudes as well as the attitudes of Parsis towards their ancestral homeland Of particular significance this book shows are the seminal years of the Iranian Constitutional

Revolution 1906 11 and the rise in the glorification of the pre Islamic past which culminated in the state nationalism expounded by Reza Shah These political moments had a profound impact on how Zoroastrians in India felt about their future in the country and reveal a complex web of relations between the Parsis the Zoroastrians of Iran and the British
