Using Data to Focus Instructional Improvement Cheryl James-Ward, Douglas Fisher, Nancy Frey, Diane Lapp, 2013-02-06 Data Does the word make you cringe Does it evoke feelings of guilt Are you unsure how to distill it and use it effectively Grab this book and learn how to empower yourself and your school community with information gleaned from your school's data Experienced educators and authors offer simple instructions that can help focus school improvement efforts and result in increasing teacher expertise a factor that positively affects the quality of life for students long after they have left the classroom Accepting responsibility for such far reaching influence requires educators to adopt instructional improvement as a standard by which a school needs to operate and as a means to collaborate and interact with one another More than that though instructional improvement is an important component of successful schools Learn how to improve instruction by Collecting the right data the right way Incorporating relevant data into everyone's daily life Resisting the impulse to set brand new goals every year Never settling for good enough Anticipating changes big and small local and federal Collaborating and avoiding privatized practice Involving all stakeholders in identifying problems setting goals and analyzing data Agreeing on what constitutes high quality instruction and feedback The challenge is to understand that data not intuition or anecdotal reports are tools to be used in getting better at teaching students And teaching students effectively is what schools are all about Following the guidance in this book overcome uncertainty and concerns about data as you learn to collect and analyze both soft and hard data and use their secrets for instructional improvement in your school *The Mathematics Program Improvement Review* Ron Pelfrey, 2006 How good is your school's mathematics program Test scores can provide some general trend information but what you and your students parents really need are specifics about the quality of the curriculum the effectiveness of the instruction and the school's overall capacity to support mathematics learning The Mathematics Program Improvement Review MPIR is a proven evaluation process focused on standards for high quality mathematics programs in grades K-12 Based on research into effective program evaluation methods the MPIR approach uses multiple data sources to clarify exactly what is working within an individual school's math program and what is not Author and MPIR developer Ron Pelfrey has used this process to evaluate mathematics programs in more than 300 rural urban and suburban schools and has trained hundreds of educators to conduct reviews Now this handbook makes the MPIR process and its benefits available to everyone Inside you'll find guidelines for training review team members and all the materials needed to conduct a review including Lists of standards and indicators for the 10 essential components of an effective mathematics program Templates for questionnaires interviews and classroom observations Detailed evaluation rubrics Forms for compiling ratings and generating a final report Whether used as a basis for informal faculty or departmental discussion to promote best practices in a particular area such as curriculum or instruction or to guide a formal program evaluation this book will help any school or district apply MPIR tools and procedures to bring about positive change
