writer's love of science and the path that led him to the Santa Fe Institute and offers a rare look behind its closed doors. The book probes the STEM subjects with chapters focused on technology, engineering, and math within and throughout McCarthy's fictional universe and biography. The final chapter explores McCarthy's friendship with Guy Davenport and their shared interest in creating a unified aesthetic theory alongside McCarthy's essays and most recent literary projects, *The Passenger* and *Stella Maris*. In arguing that science and art are connected by aesthetics, Giemza confirms the profound truth of McCarthy's unwavering belief that there's a beauty to science and a language of human understanding that transcends words.
