Uveitis E. Mitchel Opremcak, 2012-12-06 As a garden is to a gardener so a book is to its author. Nurtured out of love both are a source of pride and hope. Microbiology immunology infectious diseases rheumatology and ophthalmology are the seeds of this textbook on uveitis. Over the years these branches of medicine have been cultivated and garnered to care for patients with inflammatory diseases of the eye a most hardy species in the family of ocular maladies. The aim of this clinical manual is to give both a serviceable framework and practical information on ocular inflammatory disease. The first section is devoted to general principles and commonly held suppositions in the field of uveitis. A system of diagnosis based on the differential is also offered. Traumatic uveitis is addressed in the second section. The third part examines infectious diseases that have been identified with uveitis. These are frequently curable forms of ocular inflammation caused by replicating foreign antigens. The fourth section of this textbook considers inflammatory diseases of the eye with a presumed autoimmune mechanism. A disobedient autoreactive immune response is postulated to play a role in these forms of uveitis. Masquerade and

idiopathic conditions are discussed in the final chapters Etiology epidemiology pathogenesis clinical presentation diagnosis differential diagnosis treatment and prognosis are provided for each disease syndrome As with most gardens there are many styles and delightful entrances to the field of uveitis The Cook's Oracle William Kitchiner,1830 *Hot Line Farm*
