The Oxford Handbook of International Climate Change Law Cinnamon Piñon Carlarne, Kevin R. Gray, Richard Tarasofsky, 2016 As the threats posed by changing weather patterns are becoming more apparent climate change law has emerged as an important area of law in its own right This Handbook provides a comprehensive understanding of this growing subject setting out the key institutions and processes and featuring interdisciplinary insights from leading experts The Public's Law Blake Emerson, 2019-02-15 The Public's Law is a theory and history of democracy in the American administrative state The book describes how American Progressive thinkers such as John Dewey W E B Du Bois and Woodrow Wilson developed a democratic understanding of the state from their study of Hegelian political thought G W F Hegel understood the state as an institution that regulated society in the interest of freedom This normative account of the state distinguished his view from later German theorists such as Max Weber who adopted a technocratic conception of bureaucracy and others such as Carl Schmitt who prioritized the will of the chief executive The Progressives embraced Hegel's view of the connection between bureaucracy and freedom but sought to democratize his concept of the state They agreed that welfare services economic regulation and official discretion were needed to guarantee conditions for self-determination But they stressed that the people should participate deeply in administrative policymaking This Progressive ideal influenced administrative programs during the New Deal It also sheds light on interventions in the War on Poverty and the Second Reconstruction as well as on the Administrative Procedure Act of 1946 The book develops a normative theory of the state on the basis of this intellectual and institutional history with implications for deliberative democratic theory constitutional theory and administrative law On this view the administrative state should provide regulation and social services through deliberative procedures rather than hinge its legitimacy on presidential authority or economic reasoning Winemaking V.
