Limiting Base Erosion Erik Pinetz, Erich Schaffer, 2017-08-30 Limiting base erosion from different viewpoints Hybrid mismatch arrangements CFC rules transfer pricing rules Limiting Base Erosion the general topic for the master theses of the part time LL M program 2015 2017 has been one of the most controversial topics in international tax law ever since the initiation of the OECD BEPS Project in 2013 Even though the final reports of the 15 BEPS Actions were released by the OECD in as early as October 2015 the question how to effectively target base erosion practices still has not lost any of its topicality Following

the efforts of the OECD in developing a new international tax environment the focus of attention has now partly shifted to the OECD Member countries that have to properly implement the OECD recommendations in their domestic laws as well as in their tax treaty practice In this respect a comprehensive analysis in the literature of all the issues related to base erosion proves to be of the utmost importance in order to provide practical guidance to the Member countries during that the process of implementation This book deals especially with four key areas of interest Limiting base erosion by neutralizing the effects of hybrid mismatch arrangements Limiting base erosion by strengthening CFC rules Measures against base erosion via interest deductions and other financial payments Limiting base erosion by improving transfer pricing rules On that basis 27 concrete topics were chosen in order to address the four key areas of interest from different viewpoints Base erosion and the challenges they present read more in *Limiting Base Erosion* Public-Private Partnerships in Sub-Saharan Africa James Leigland, 2020 Public private partnerships have been widely promoted in the international development community as solutions to severe infrastructure problems in low income countries since the 1990s This book summarizes the growing body of evidence on the actual performance of PPPs and develops a more realistic perspective on their practical value *The Great Transition* Lester R. Brown, 2015-04-13 The great energy transition from fossil fuels to renewable sources of energy is under way As oil insecurity deepens the extraction risks of fossil fuels rise and concerns about climate instability cast a shadow over the future of coal a new world energy economy is emerging The old economy fueled by oil natural gas and coal is being replaced with one powered by wind solar and geothermal energy The Great Transition details the accelerating pace of this global energy revolution As many countries become less enamored with coal and nuclear power they are embracing an array of clean renewable energies Whereas solar energy projects were once small scale largely designed for residential use energy investors are now building utility scale solar projects Strides are being made some of the huge wind farm complexes under construction in China will each produce as much electricity as several nuclear power plants and an electrified transport system supplemented by the use of bicycles could reshape the way we think about mobility *Self-Determination and Humanitarian Secession in International Law of a Globalized World* Juan Francisco Escudero Espinosa, 2018-03-24 This book addresses questions in connection with the international legal regime on demands for secession which have arisen in various States More specifically it examines the unilateral declarations of independence by Kosovo in 2008 and by Crimea and its subsequent annexation by the Russian Federation in 2014 The work investigates the two cases so as to shed light on the international legal regime affecting entities that are smaller than a sovereign State It analyzes the relevant principles of international law the intention being to determine their scope and review them in light of the most recent practice and developments in international law In turn the book examines and explains the events of relevance for international law that occurred in the changing situations in Kosovo and Crimea On the basis of these legal considerations it explores how the international community can respond when faced with situations that may violate international law together with the

effectiveness of various measures It also discusses whether certain situations might be legitimate as a concept could now be emerging that secession may be justified in specific circumstances such as serious and widespread violations of basic human rights
