Tigary: The Panarchy of War Mirjam Van Reisen, Munyaradzi Mawere, 2024-11-17 The Tigray War 2020 2022 left a deep and lasting impact not only on Tigray but also on the wider Horn of Africa In this second book in a three part series the authors examine the devastation wrought by the war on Tigray s cultural heritage and identity The deliberate destruction of ancient cultural sites and the assault on the Tigrayan people s identity have fueled a desire for greater autonomy among the people of Tigray to protect their future Through the lens of Panarchy this book explores how the war s effects extend far beyond Tigray reshaping the dynamics of the entire region Crucially it uncovers Eritrea s secret role in the conflict which was deliberately concealed by Ethiopia Eritrean forces were implicated not only in atrocities but also in the use of particularly cruel and inhumane sexual violence intended to break the spirit of the Tigrayan people and erase Tigray as an ethnic and cultural group This ethnographic research conducted in collaboration with universities inside and outside Ethiopia reveals the profound transformations caused by the war with consequences that will reverberate for years to come It sheds light on the war s long term impact and highlights the urgent need for international attention on the challenges faced by Tigray and the wider region

Structural Transformation and Economic Development Banji Oyelaran-Oyeyinka, Kaushalesh Lal, 2016-09-13 This book examines long term structural changes and the broad impact on economic development in regional comparative perspectives The book analyzes data across Africa Asia and Latin America It

looks at key variables of productivity growth industrialization poverty urbanization and employment This book is concerned with understanding structural change dynamics and how it affects job creation living standards and the efficiency of productive cities through manufacturing productivity growth that benefits majority of citizens With empirical evidence from a selected number of developing countries including China India Brazil Nigeria and South Africa the book attempts to present the considerable structural changes of these countries over the last few decades It highlights that growth without the expected job creation is one of the distinct features of growth in emerging and developing countries It suggests that countries may well record economic growth whether through within sector productivity increase or through structural change but this may not necessarily lead to employment an important concern for long term development Cash Not Care Mo Stewart,2016-09-14 Mo Stewart is a former healthcare professional a disabled female veteran and an independent researcher This book is the culmination of six years of self funded research and the evidence exposes the influence of corporate America since 1992 with the future welfare reforms of the UK The impact of the enforced austerity measures of the UK government is identified as they negatively affect the welfare and the survival of the chronically sick and disabled population in receipt of welfare benefits when unfit to work The research has informed welfare reform debates in the House of Lords and the House of Commons since 2011 and contributed to the evidence used by the United Nations to investigate the UK government for breaches of the Human Rights of sick and disabled people Endorsed by the disabled community and by academics the research has identified the adoption of lethal social policies copied from American social security policies and linked to the death of thousands of the most vulnerable of all as the UK welfare state is systematically demolished as all planned over thirty years ago by a previous Conservative government *Debates in Primary Education* Virginia Bower,2020-10-19 This powerful text encourages both pre service and established teachers as well as teacher educators to engage with contemporary debates in primary education Promoting a critical approach the chapters explore a wide range of key themes including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects At the same time the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning for life The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding thus increasing teacher agency and confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading mathematics languages early years education and the use of technology With annotated further reading and reflective questions this key text is essential reading for all those wanting to develop a better understanding of the issues that shape their practice including student teachers at both undergraduate and postgraduate level practising teachers engaged in continuing professional development and teacher

educators Law's Documents Katherine Biber, Trish Luker, Priya Vaughan, 2021-12-29 Illuminating their breadth and diversity this book presents a comprehensive and multidisciplinary view of legal documents and their manifold forms uses materialities and meanings In 1951 Suzanne Briet a librarian at the Bibliotheque Nationale in Paris famously said that an antelope in a zoo could be a document thereby radically changing the way documents were analysed and understood In the fifty years since this pronouncement the digital age has introduced a potentially limitless range of digital and technological forms for the capture and storage of information In their multiplicity and their ubiquity documents pervade our everyday life However the material intellectual aesthetic and political dimensions and effects of documents remain difficult to pin down Taking a multidisciplinary and international approach this collection tackles the question what is a legal document in order to explore the material aesthetic and intellectual attributes of legal documentation the political and colonial orders reflected and embedded in documents and the legal archival and social systems which order and utilise information As well as scholars in law documentary theory history Indigenous studies art history and design theory and practice this book will also appeal to those working in libraries archives galleries and museums for whom the ongoing challenges of documentation in the digital age are urgent and timely questions *Russia and the New World Disorder* Bobo Lo, 2015-08-17 The Russian annexation of Crimea was one of the great strategic shocks of the past twenty five years For many in the West Moscow's actions in early 2014 marked the end of illusions about cooperation and the return to geopolitical and ideological confrontation Russia for so long a peripheral presence had become the central actor in a new global drama In this groundbreaking book renowned scholar Bobo Lo analyzes the broader context of the crisis by examining the interplay between Russian foreign policy and an increasingly anarchic international environment He argues that Moscow's approach to regional and global affairs reflects the tension between two very different worlds the perceptual and the actual The Kremlin highlights the decline of the West a resurgent Russia and the emergence of a new multipolar order But this idealized view is contradicted by a world disorder that challenges core assumptions about the dominance of great powers and the utility of military might Its lesson is that only those states that embrace change will prosper in the twenty first century A Russia able to redefine itself as a modern power would exert a critical influence in many areas of international politics But a Russia that rests on an outdated sense of entitlement may end up instead as one of the principal casualties of global transformation *Youth Migration and the Politics of Wellbeing* Elaine Chase, Jennifer Allsopp, 2020-11-18 This book examines the factors affecting the health and wellbeing of young people as they transition to adulthood under the shadow of migration control Drawing on unique longitudinal data it illuminates how they conceptualize wellbeing for themselves and others in contexts of prolonged and politically induced uncertainty The authors offer an in depth analysis of the experiences of over one hundred unaccompanied young migrants primarily from Afghanistan Albania and Eritrea They show the lengths these young people will go to in pursuit of safety security and the futures they aspire to Interdisciplinary in nature the book champions a new political

economy analysis of wellbeing in the context of migration and demonstrates the urgent need for policy reform Social Reformism 2.0 Maurizio Ferrera, Joan Miró, Stefano Ronchi, 2024-01-18 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com Automation digitalisation the post industrial transition and climate change are creating new social risks which are not adequately supported by established welfare state institutions In this timely book Maurizio Ferrera Joan Mir and Stefano Ronchi propose critical social and institutional policy reform in response to the nation state's inability to maintain a balanced ecosystem between democracy the market economy welfare and the rule of law Russia's Arctic Strategies and the Future of the Far North Marlene Laruelle, 2015-01-28 This book offers the first comprehensive examination of Russia's Arctic strategy ranging from climate change issues and territorial disputes to energy policy and domestic challenges As the receding polar ice increases the accessibility of the Arctic region rival powers have been manoeuvring for geopolitical and resource security Geographically Russia controls half of the Arctic coastline 40 percent of the land area beyond the Circumpolar North and three quarters of the Arctic population In total the sea and land surface area of the Russian Arctic is about 6 million square kilometres Economically as much as 20 percent of Russia's GDP and its total exports is generated north of the Arctic Circle In terms of resources about 95 percent of its gas 75 percent of its oil 96 percent of its platinum 90 percent of its nickel and cobalt and 60 percent of its copper reserves are found in Arctic and Sub Arctic regions Add to this the riches of the continental shelf seabed and waters ranging from rare earth minerals to fish stocks After a spike of aggressive rhetoric when Russia planted its flag in the Arctic seabed in 2007 Moscow has attempted to strengthen its position as a key factor in developing an international consensus concerning a region where its relative advantages are manifest despite its diminishing military technological and human capacities
