**The Truth Pill** Dinesh Singh Thakur, Prashant Reddy Thikkavarapu, 2022-10-10 Since 2004 when the fraud at Ranbaxy the largest Indian pharmaceutical company at the time first came to light the Indian pharmaceutical industry and clinical research organizations have been rocked by a series of scandals after investigations by American and European drug regulators While the West has responded to concerns about quality of Made in India medicine by blocking exports from many Indian pharmaceutical companies the Indian government responded not with regulatory reform but conspiracy theories about vested interests working against India More worryingly the Indian state has also turned a blind eye to a far more serious quality crisis in its domestic pharmaceutical market At times these quality issues manifest themselves in the deaths of Indian citizens as happened in early 2020 when 11 children died in Jammu because of adulterated cough syrup On other occasions a dodgy drug approval process has led to the Indian regulator approving sales of drugs that have never been approved by regulators in the developed markets The result is not just poor health outcomes but outsize profits for pharmaceutical companies manufacturing medicines that have never been validated through scientifically rigorous clinical trials for therapeutic evidence These twin crises in both the domestic and export markets is because India has either outdated regulations or no regulations in some areas Even the outdated regulations are enforced with kid gloves by drug inspectors and judicial magistrates who are ready to forgive even those whose drugs are found to contain barely any active ingredient or dangerously high levels of bacterial endotoxins In a race for growth of the pharmaceutical industry the Indian state has sacrificed scientific rigour and ignored the basic principles of public health Given India's position as the pharmacy of the developing world the failure of the Indian state is a problem for not just India but most of the developing world This timely important and compelling book based on deep research questions and analyzes the actions of the institutions that are responsible for the safety and efficacy of the Indian drug supply in the context of the historical evolution of the Drugs Act 1940 from pre Independence India to the present day The future of Indian public health lies in responding to the issues raised in this book

**Business-State Relations under PT Governments** Stefanie Tomé Schmitt, 2022-02-21 During the Partido dos Trabalhadores PT Workers Party Governments in Brazil non electoral and extra parliamentary political participation grew significantly Both Lula and Rousseff used an increasing number of mechanisms of participation known in Portuguese as *rg os colegiados* collegiate bodies for democratizing political decisions Stefanie Tom Schmitt's book addresses the impacts of participatory policy making on business state relations under the New Developmentalism Her research uncovers business participation in 125 collegiate bodies based on data collected with the peak sectoral corporatist business associations of agriculture commerce industry and financial services It discloses a formalized pattern of business politics linked to the use of Corporatist Institutions exposing a gap between Political Sociology and Political Economy approaches to interest representation in Brazil In joining the rule configuration assessment with a process tracing of participatory policy

making in employment innovation and biodiversity her investigation also reveals that engendering a more formalized pattern of business politics relied on more than choices of institutional design promoting business inclusiveness it was contingent on business and government commitment building within mechanisms of participation and in related policy networks

*Principles of Clinical Medicine for Space Flight* Michael R. Barratt, Ellen S. Baker, Sam L. Pool, 2020-01-02 In its first edition *Principles of Clinical Medicine for Space Flight* established itself as the authoritative reference on the contemporary knowledge base of space medicine and standards of care for space flyers It received excellent notices and is used in the curricula of civilian and military training programs and used as a source of questions for the Aerospace Medicine Certifying Examination under the American Board of Preventive Medicine In the intervening few years the continuous manning of the International Space Station has both strengthened existing knowledge and uncovered new and significant phenomena related to the human in space The Second Edition incorporates this information Gaps in the first edition will be addressed with the addition new and revised chapters This edition is extensively peer reviewed and represents the most up to date knowledge

**Global Social Policy** Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline *Global Social Policy* opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels

**Arab Dawn** Bessma Momani, 2015-11-26 In the West news about the Middle East is dominated by an endless stream of reports and commentary about civil war sectarian violence religious extremism and economic stagnation But do they tell the full story For instance who knew that university enrolment in the war torn Palestinian territories exceeds that of Hong Kong or that more than a third of Lebanese entrepreneurs are women Change is on its way in the Middle East argues Bessma Momani and its cause is demographic Today one in five Arabs is between the ages of fifteen and twenty four Young optimistic and increasingly

cosmopolitan their generation will shape the region's future Drawing on interviews surveys and other research conducted with young people in fifteen countries across the Arab world Momani describes the passion for entrepreneurship reform and equality among Arab youth With insightful political analysis based on the latest statistics and first hand accounts Arab Dawn is an invigorating study of the Arab world and the transformative power of youth

**Underbug** Lisa Margonelli, 2018-08-21 The award winning journalist Lisa Margonelli national bestselling author of Oil on the Brain Petroleum's Long Strange Trip to Your Tank investigates the environmental and economic impact termites inflict on human societies in this fascinating examination of one of nature's most misunderstood insects Are we more like termites than we ever imagined In Underbug the award winning journalist Lisa Margonelli introduces us to the enigmatic creatures that collectively outweigh human beings ten to one and consume 40 billion worth of valuable stuff annually and yet in Margonelli's telling seem weirdly familiar Over the course of a decade long obsession with the little bugs Margonelli pokes around termite mounds and high tech research facilities closely watching biologists roboticists and geneticists Her globe trotting journey veers into uncharted territory from evolutionary theory to Edwardian science literature to the military industrial complex What begins as a natural history of the termite becomes a personal exploration of the unnatural future we're building with darker observations on power technology historical trauma and the limits of human cognition Whether in Namibia or Cambridge Arizona or Australia Margonelli turns up astounding facts and raises provocative questions Is a termite an individual or a unit of a superorganism Can we harness the termite's properties to change the world If we build termite like swarming robots will they inevitably destroy us Is it possible to think without having a mind Underbug burrows into these questions and many others unearthing disquieting answers about the world's most underrated insect and what it means to be human

**Assured Destruction** David Bath, 2020-03-15 Assured Destruction Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war

**Governomics** Ian McAuley, Miriam Lyons, 2015-05-01 People have good reason to demand decent public education and a well funded health

system to yearn for an economy that doesn't trash the environment or for a smaller gap between rich and poor. Almost without exception, sound economics is on their side. We've grown used to public debates that pit people and the planet against an abstract, distorted image of the economy, but it doesn't have to be this way. *Governomics* shows that an emaciated state is bad for business and that standing up for government means standing up for a public sector that truly serves the public. Everybody knows governments are wasteful, incompetent, and a drag on the economy. But if you're not sure that's true, read this book. Ross Gittins, *Sydney Morning Herald* and *The Age*. *Governomics* shows that a market economy can only work when sustained by a strong and active public sector. It will inject some much-needed economic sanity into conversations on the role of government in Australia. John Quiggin, Australian Research Council Laureate Fellow, University of Queensland. **The Rhetorical Invention of America's National Security State** Marouf Hasian Jr., Sean Lawson, Megan D. McFarlane, 2015-07-29

*The Rhetorical Invention of America's National Security State* examines the rhetoric and discourse produced by and constitutive of America's national security state. Hasian, Lawson, and McFarlane illustrate the importance of rhetoric to the expansion of the American national security state in the post-9/11 era through their examination of the global war on terrorism, enhanced interrogation techniques, drone crew stress activities, Edward Snowden's rise, Special Forces, and popular representations of counterterrorism. The coauthors contend this expansion was not the result of lone imperial executives or a nefarious state within a state, but was co-produced by elite and non-elite Americans alike who not only condoned but also in many cases demanded the expansion of the national security state. This work will be of interest to scholars in communication studies and political science. **The Continuing Imperialism of Free Trade** Jo Grady, Chris Grocott, 2018-10-08 In 1953 John Gallagher and Ronald Robinson shook the foundations of imperial history with their essay *The Imperialism of Free Trade*. They reshaped how historians saw the British empire, focussing not on the red bits on the map and the wishes of policy makers in London, but rather on British economic and political influence globally. Expanding on this analysis, this volume provides an examination of imperialism which brings the reader right up to the present. This book offers an innovative assessment and analysis of the history and contemporary status of imperial control. It does so in four parts: examining the historical emergence and traditions of imperialism; the relationships between the periphery and the metropolitan; the role of supranational agencies in the extension of imperial control; and how these connect to financialisation and international political economy. The book provides a dynamic and unique perspective on imperialism by bringing together a range of contributors, both established and up-and-coming scholars, activists, and those from industry, from a wide range of disciplines and backgrounds. In providing these authors a space to apply their insights, this engaging volume sheds light on the practical implications of imperialism for the contemporary world. With a broad chronological and geographical sweep, this book provides theoretical and empirical engagements with the nature of imperialism and its effects upon societies. It will be of great interest to a broad range of disciplines across the humanities and social sciences, especially those working in History.
