*The Imperial Japanese Navy in the Pacific War* Mark Stille, 2014-11-20 A highly illustrated examination of the key ships tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II The Imperial Japanese Navy IJN was the third most powerful navy in the world at the start of World War II and came to dominate the Pacific in the early months of the war This was a remarkable turnaround for a navy that only began to modernize in 1868 although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose Bringing together for the first time material previously published in Osprey series books and with the addition of new writing making use of the most recent research this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed how they were armed when and where they were deployed and how effective they were in battle The Imperial Japanese Navy in the Pacific War provides a history of the IJN s deployment and engagements analysis of the evolution of strategy and tactics and finally addresses the question of whether it truly was a modern navy fully prepared for the rigors of combat in the Pacific Illustrated throughout with photographs and detailed colour artworks this is a valuable reference source for Pacific War enthusiasts and historians alike *Imperial Japanese Navy Destroyers 1919-45 (1)* Mark Stille, 2013-03-20 This volume will detail the history weapons and tactics of the Japanese destroyers built before the war This includes the famous Fubuki class called Special Type by the Japanese which were when completed in the late 1920 s the most powerful class of destroyers in the world This design forced all other major navies to follow suite and provided the basic design for the next many classes of Imperial Navy destroyers This book will also cover the three classes built before the Special Type which were based on a German World War I design as well as two classes built after the advent of the Special Type All of these ships had a rich history as they fought from the first battles of the Pacific War up until the very end when several accompanied the superbattleship Yamato on her death sortie The final part of the book will be an analysis of the destroyer designs covered in the book which will include an examination of their strengths and weaknesses The success or lack of success of these designs will be discussed and they will be compared to comparable Allied destroyer designs *Sealift* ,1969 *Sealift Magazine* ,1966 **World Atlas of Christian Missions** Student Volunteer Movement for Foreign Missions, 1911 **Bureau of Naval Personnel Information Bulletin** ,1944 *Military Sea Transportation Service Magazine* ,1968 **Dictionary of American Naval Fighting Ships** United States. start of an offensive in the Central Solomons aimed at New Georgia New Georgia The Second Battle for the Solomons tells the story of the land sea and air battles fought there from March through October 1943 Making careful and copious use of both Japanese and Allied sources Ronnie Day masterfully weaves the intricate threads of these battles into a well crafted narrative of this pivotal period in the war As Day makes clear combat in the Solomons exemplified the war in the Pacific especially the importance of air power something the Japanese failed to understand until it was too late and the strategy of island hopping bypassing Japanese strongholds including Rabaul in favor of weaker or more strategically advantageous targets This multifaceted account gives the fighting for New Georgia its proper place in the history of the drive to break the Japanese defensive perimeter and bring the homeland within range of Allied bombers **Dictionary of American Naval Fighting Ships: Historical sketches** ,1969 America's Fighting Admirals William Tuohy,2007 American naval actions of World War II comprise the most widespread complex and dramatic battles in the history of sea warfare The fighting took place over vast distances in the Atlantic and Pacific oceans as well as in the constricted spaces of the Mediterranean and Solomon seas Each of the major actions had an admiral the commander in charge who led the battle In combat the abilities and determination of these commanders at sea were put to the most severe test Americas Fighting Admirals describes the course of U S sea action in World War II It examines the skills strengths weaknesses and personalities of the American admirals who fought the battles at sea It examines the effect that stress tension and responsibility have on commanders making vital decisions in the red hot crucible of battle And it reveals the changing nature of the responsibilities of flag officers as the war progressed and became enormously complex **Black Cat Raiders of WWII** Richard C Knott,2012-04-15 Thanks to the PBY s daring pilots and their effective tactics the slow outdated Catalina patrol bombers became the scourge of Japanese shipping in the South Pacific during World War II Painted black and hunting at night the Black Cats as they were called are credited with sinking or disabling hundreds of thousands of tons of cargo vessels troop transports and warships Curiously their exploits were known to few outside the naval aviation community until the publication of this book in 1981 This testimonial to their magnificent performance is told by an experienced flying boat pilot who has pieced together the fascinating story from reminiscences of the men who flew the long arduous missions and from official navy records It is an inspiring tale of fearless men in machines ill designed for combat who wreaked havoc on a dangerous and merciless adversary Illustrated with more than sixty photographs and detailed line drawings it is a book to be savored by those who like their adventure stories to ring true Statistical Atlas of Christian Missions Harlan Page Beach,James S.
