**Contemporary Ergonomics and Human Factors 2015** Sarah Sharples, 2018-06-08 Ergonomics and human factors is the discipline concerned with the application of scientific knowledge to improve people's interaction with products, systems and environments. This book presents the proceedings of the international conference Ergonomics and Human Factors 2015, the 29th year in which a volume in the Contemporary Ergonomics series has been published. **Mobile Service Robotics** Mohammad Osman Tokhi, Krzysztof Kozłowski, Gurvinder S. Virk, 2014-07-07 Interest in control of climbing and walking robots has remarkably increased over the years. Novel solutions of complex mechanical systems such as climbing, walking, flying and running robots with different kinds of locomotion and the technologies that support them and their applications are the evidence of significant progress in the area of robotics. Supporting technologies include the means by which robots use to sense, model and navigate through their environments and, of course, actuation and control technologies. Human interaction including exoskeletons, prostheses and orthoses as well as service robots are increasingly active, important, pertinent areas of research. In addition, legged machines and tracked platforms with software architecture seem to be currently the research idea of most interest to the robotics community. **Ockham's Razors** Elliott Sober, 2015-07-23 This book uses philosophy, science and probability to analyse why simpler theories are better than theories that are more complex. **Moody's International Manual**, 1995 *The Social Impact of Advertising* Tony Kelso, 2018-09-14 Composed with a touch of the panache of a former advertising copywriter, Kelso challenges readers to reflect on the social impact of advertising from multiple angles. The book uniquely combines personal anecdotes with a penetrating look at some of the most critical perspectives toward the field advanced by media scholars. A play on David Ogilvy's legendary *Confessions of an Advertising Man*, the text disrupts the creative guru's account with a highly accessible critique of advertising suitable for classes in disciplines as various as cultural studies, marketing, media studies, political science and sociology. The book reflects the latest industry trends, especially the migration from legacy to social media vehicles like Instagram and Snapchat. Topics covered include a brief history of modern advertising in the United States, advertising's influence on the so-called non-advertising content of the media, the ideological themes advertising inadvertently delivers, how advertising can privilege or marginalize various social constructions of identity, the controversial practice of targeting children and how corporations often use advertising to superficially present a positive face while masking their profoundly darker sides. Incorporating a media literacy approach, Kelso also offers an insider's overview of the typical procedures advertising agencies take in strategizing, conceptualizing and delivering campaigns. **Tax by Design for the Netherlands** Sijbren Cnossen, Bas Jacobs, 2022 This book provides evidence-based analyses of the Dutch tax system's shortcomings as well as detailed proposals for reform. **Popular Science**, 1970-11 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and

technology are the driving forces that will help make it better
