Background and Introduction to Gattaca

Gattaca is a 1997 American dystopian science fiction film written and directed by Andrew Niccol in his feature directorial debut. The film presents a future society driven by eugenics where children are conceived through genetic selection to ensure they possess the best hereditary traits of their parents. The film centers on Vincent Freeman, played by Hawke, who was conceived outside the eugenics program and struggles to overcome genetic discrimination as he sets his dreams of going into space.

The film draws on concerns over reproductive technologies that facilitate eugenics, and the possible consequences of such technological developments for society. It also explores the idea of destiny and the ways in which it can and does govern lives. Characters in Gattaca continually battle both with society and with themselves to find their place in the world and who they are destined to be according to their genes. The film is noted for its unique use of color. Cinematographer Shawnee Smith employed vibrant gold, green, and electric blue tones throughout the film, and shot the film in Super 16mm format, which adds an enlarged layer of grain.

The film was shot under the working title *The Eighth Day*, a reference to the seven days of creation in the Bible. However, by the time its release was scheduled for the fall of 1997, the Belgian film *Le huitième jour* had already been released in the US under the title *The Eighth Day*. As a result, the film was retitled *Gattaca*, which takes inspiration from the letters G, A, T, and C, derived from four of the nucleobases of DNA: guanine, adenine, thymine and cytosine. The film tanked at the box office and only earned a domestic total of \$32.3 million against a reported budget of \$36 million. It was a 1997 nominee for the Academy Award for Best Art Direction and the Golden Globe Award for Best Original Score. A follow-up series was in development at Showtime, but has been cancelled as of 2003. Gattaca currently holds an 82% fresh rating on Rotten Tomatoes with the following critics' consensus: "Intelligent and scientifically provocative, Gattaca is an absorbing sci-fi drama that poses important interesting ethical questions about the nature of science." button issues are topics of primary concern to politicians lawmakers religious leaders and ordinary citizens alike Designing public policies to meet the needs of a diverse society is challenging and the variety of necessary perspectives are often clouded by competing ideas about social responsibility personal freedom religious beliefs and governmental intervention Here prominent Jewish scholars and commentators address various social issues and public policies from a Jewish perspective using Jewish sources and documents to elucidate responses and propose solutions that are in keeping with Jewish law as set out by the major documents of the Jewish faith Their conclusions about ways to consider issues of public concern and private consideration and their adherence to conservative politics may surprise readers What emerges is the notion that Jewish thought can contribute to the American political discourse and is available to anyone looking for answers to today's toughest questions Creating a public policy to address social issues that is both responsible and morally guided can be a difficult proposition for lawmakers Making personal decisions about these same issues can be even more difficult as people struggle for guidance Addressing many of the issues that are hotly debated in the media and in the corridors of our government conservative reform and orthodox commentators carefully outline an approach for lawmakers and individuals This approach incorporates Jewish law into a public policy philosophy that is both conservative leaning and politically available Taken as a whole the essays underscore that Jewish tradition mostly albeit not invariably leads one to the politically conservative side of the aisle

Toward a Counternarrative Theology of Race and Whiteness Christopher M.

Baker, 2022-05-10 This book argues that race and whiteness are central to the construction of the modern world Constructive Theology needs to take them seriously as primary theological problems In doing so Constructive Theology must fundamentally change its approach and draw from the emerging field of Philosophy of Race Christopher M Baker develops a genealogy of race that understands whiteness as a kind secular soteriology and develops a counternarrative theological method informed by resources from Philosophy of Race He then deploys that method to read science fiction cinema and superhero stories as cultural racial and theological documents that can be critically engaged and redeployed as counternarratives to dominant racial narratives

Experiencing the New Genetics Kaja Finkler, 2010-08-03

Over the past several decades there has been an explosion of interest in genetics and genetic inheritance within both the research community and the mass media The science of genetics now forecasts great advances in alleviating disease and prolonging human life placing the family and kin group under the spotlight In *Experiencing the New Genetics* Kaja Finkler argues that the often uncritical presentation of research on genetic inheritance as well as the attitudes of some in the biomedical establishment contribute to a genetic essentialism a new genetic determinism and the medicalization of kinship in American society She explores some of the social and cultural consequences of this phenomenon Finkler discovers that the new genetics can turn a healthy person into a perpetual patient complicate the redefinition of the family that has been occurring in American society for the past few decades and lead to the abdication of responsibility for addressing the problem of

unhealthy environmental conditions Experiencing the New Genetics will assist scholars and general readers alike in making sense of this timely and multifaceted issue **Biotech Juggernaut** Tina Stevens, Stuart Newman, 2019-01-21 Biotech Juggernaut Hope Hype and Hidden Agendas of Entrepreneurial BioScience relates the intensifying effort of bioentrepreneurs to apply genetic engineering technologies to the human species and to extend the commercial reach of synthetic biology or extreme genetic engineering In 1980 legal developments concerning patenting laws transformed scientific researchers into bioentrepreneurs Often motivated to create profit driven biotech start up companies or to serve on their advisory boards university researchers now commonly operate under serious conflicts of interest These conflicts stand in the way of giving full consideration to the social and ethical consequences of the technologies they seek to develop Too often bioentrepreneurs have worked to obscure how these technologies could alter human evolution and to hide the social costs of keeping on this path Tracing the rise and cultural politics of biotechnology from a critical perspective Biotech Juggernaut aims to correct the informational imbalance between producers of biotechnologies on the one hand and the intended consumers of these technologies and general society on the other It explains how the converging vectors of economic political social and cultural elements driving biotechnology's swift advance constitutes a juggernaut It concludes with a reflection on whether it is possible for an informed public to halt what appears to be a runaway force
