about what would happen to a lost ball in the n th dimension or explaining that there are such things as quasirandom numbers Hayes wants readers to share his enthusiasm That s why he imagines a cinematic treatment of the discovery of the Riemann zeta function The year 1972 The scene Afternoon tea in Fuld Hall at the Institute for Advanced Study in Princeton New Jersey explains that there is math in Sudoku after all and describes better than average averages Even when some of these essays involve a hike up the learning curve the view from the top is worth it Revue Semestrielle Des Publications Mathématiques ,1913
