Migration movements have been a constant in the societies of the past as well as in postmodern society. However, in the past ten years, the increase in political, economic, and religious conflict amongst nations, the increase of the poverty index, and many and various natural disasters have duplicated the forced displacement of millions of people across the seven continents of the planet. This situation brings important challenges in terms of the vulnerability, inequity, and discrimination that certain peoples suffer. Professionals from the fields of the social sciences, education, psychology, and international law share the fact that education represents an opportunity for children and young migrants to become members with full rights in the societies they arrive in. Empirical studies show that the implementation of the right to education for migrants presents some challenges and dilemmas to the governments of host countries and more specifically to the education centers, NGOs, universities, and the professionals working in them, hence the need for more research on these issues of immigration, refugees, social justice, and intercultural education. The Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education provides visibility to issues such as the increase in migration and displacement and the difficulties in political agreements, educational contexts, and in cultural issues: stigmatization, vulnerability, social exclusion, racism, and hatred amongst host communities. This book gives possible solutions to this current complex situation and helps foster and promote sensitivity, perspective, and critical thinking for a respectful and tolerant coexistence and promotion of equity and social justice. The chapters promote cultural diversity and inclusion in classrooms by offering knowledge, strategies, and research on organizational development for educational institutions and multicultural environments. This book is essential for administrators, policymakers, leaders, teachers, practitioners, researchers, academicians, and students interested in the promotion of social justice in education for immigrants and refugees. **A**

framework for continuous quality improvement for fast-track queues in clinics in eThekweni Dudu G. Sokhela, 2024-05-31. This book explores primary health care users who visit the clinic for short consultations: those who regularly come to collect medication for chronic illnesses such as hypertension, diabetes mellitus, arthritis, epilepsy, tuberculosis, HIV, and AIDS; clients for family planning; and babies coming for routine weight monitoring, immunisation, and routine prophylactic treatment. Since these health care users come for short consultations, the research investigates where the bottlenecks in the clinic queues resulted in long waiting times and if these consultations were of expected quality. This book arose from the author's own experience working in a primary health care setting focused on the challenges faced by patients. This book will add to the body of knowledge and management of health care users as this book offers practical recommendations that are tailor-made for specific health care users to be implemented by primary health care providers and settings. Furthermore, the country is faced with a burden of communicable and non-communicable diseases. New strategies are required to address the
