Great Britain. Parliament. House of Commons,2012 Powering Up Students Graham Powell,Guy Claxton,2019-05-31 In Powering Up Students The Learning Power Approach to high school teaching Guy Claxton and Graham Powell detail the small tweaks to daily practice that will help high school

teachers boost their students learning dispositions and attitudes Foreword by John Hattie The Learning Power Approach LPA is a pedagogical formula which aims to develop all students as confident and capable learners ready willing and able to choose design research pursue troubleshoot and evaluate learning for themselves alone and with others in school and out This approach therefore empowers teachers to complement their delivery of content knowledge and skills with the nurturing of positive habits of mind that will better prepare students to flourish in later life Building upon the foundations carefully laid in The Learning Power Approach ISBN 9781785832451 the first book in the Learning Power series Guy Claxton and Graham Powell s Powering Up Students embeds the ideas of this influential method in the context of the high school It offers a thorough explanation of how the LPA s design principles apply to this level of education and by presenting a wide range of practical strategies and classroom examples illustrates how they can be put into action with different age groups and in different curricular areas especially relating to literacy and numeracy but also in specific subjects such as science history geography and design technology All teachers can foster the capacity of students to be for example curious attentive imaginative rational and reflective and Guy and Graham provide clear guidance on how this can be achieved Step by step they explore all aspects of pedagogy from how to make learning compelling and challenging to how best to make use of the environment for learning from how to coach students so that they become more independent and responsible directors of their own learning to subtle shifts in teacher language and behaviour that change the climate for learning Rooted in the authors knowledge of international research about how students can and should learn in schools this practical guide is suitable for both newly qualified and experienced teachers of students aged 11 to 18 It will also appeal to those school principals educationalists and administrators who are committed to improving both students achievement and their preparedness for the world of learning beyond school

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England

Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Chinese Students in UK Further Education Rosemary A. Reynolds, 2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China s own education system has led to concern that UK institutions may soon see a decline in their market share Dr Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students experiences from their perspective Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages the book goes on to discuss topics such as risk technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16 18 years Dr Reynolds attempts to understand what these students experience during their studies how they manage new social relationships and whether upon course completion they achieved the results they desired at the outset Moreover the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere The book examines what further education institutions do well and where they might improve to help

develop Chinese students educational experiences As such it will be essential reading for academics researchers and postgraduates in the fields of further education sociology of education international and intercultural education and mobility studies

From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals
