I.C.S.E. Commercial Studies for Class X Dr. C. B. Gupta, Goyal Brothers Prakashan, 2019-12-01
Goyal Brothers Prakashan Next Generation Performance Management Alan L. Colquitt, 2017-08-01

There is no HR related topic more popular in the business press than performance management PM There has been an explosion in writing on this topic in the past 5 years condemning it as a failure and calling for fundamental change The vast majority of organizations use the same basic process which I call Last Generation Performance Management or PM 1.0 for short Despite widespread agreement that PM 1.0 is failing few companies have abandoned it or made fundamental changes to it While everyone agrees it is broken few agree on how to fix it Companies continue to tinker with their systems making incremental changes every few years with no lasting improvement in effectiveness Employees continue to achieve amazing things in organizations every day despite this process not because of it Nothing has worked because organizations business leaders and HR professionals focus on PM practices instead of the fundamental purpose of PM and the paradigms assumptions and beliefs that underlie the practices Companies ask their performance management process to do too many things and it fails at all of them as a result At the foundation of PM 1.0 practices is the ideology of a meritocracy and paradigms rooted in standard economic and psychological theories While these theories were adequate explanations for motivation and behavior in the 19th and 20th centuries they fail to account for the increasingly complex nature of organizations and their environments today Despite the ineffectiveness of PM 1.0 there are powerful forces holding it in place Information on rigorous evidence based recommendations is crowded out by benchmarking information case studies of high profile companies and other propaganda coming from HR think tanks and consultants Business leaders and HR professionals learn

about common practices not effective practices This book confronts the traditional dogma paradigms and practices of PM 1.0 and holds them up to the bright light of scientific scrutiny It encourages HR professionals and business leaders to abandon PM 1.0 and it offers up a more appropriate purpose for PM alternative paradigms to guide them and practical solutions that are better supported by scientific research referred to as Next Generation Performance Management or PM 2.0 for short

The Psychobiology of Emotions Jack George Thompson, 2013-06-29 Regardless of culture most adult humans report experiencing similar feelings such as anger fear humor and joy Such subjective emotional states however are not universal Members of some cultures deny experiencing specific emotions such as fear or grief Moreover within any culture individuals differ widely in their self reports of both the variety and intensity of their emotions Some people report a vivid tapestry of positive and negative emotional experiences Other people report that a single emotion such as depression or fear totally dominates their existences Still others report flat and barren emotional lives Over the past 100 years scientists have proposed numerous rival explanations of why such large individual differences in emotions occur Various authors have offered anthropological biochemical ethological neurological psychological and sociological models of human emotions Indeed the sheer number of competing theories precludes a comprehensive review in a single volume Accordingly only a representative sample of models are discussed in this book and many equally important theories have been omitted These omissions were not intended to prejudice the reader in favor of any particular conceptual framework Rather this selective coverage was intended to focus attention upon the empirical findings that contemporary theories attempt to explain
