Grade 8 Canadian History Textbook:

Historical Foundations of Education Theodore Michael Christou, 2023-03-23 This volume considers history as a foundational discipline in education. It shows how history is a means for exploring what it means to be human by considering those stories, sources, forces, and contexts that shape the way we construct narratives. History is more than content; no matter what we might recall from our experiences in schools. The volume shows how studying history is one means of uncovering why institutions, beliefs, policies, and practices are as they are. Educational structures are like all things mutable. History empowers the individual to be an actor in this process of change and to act judiciously. About the Educational Foundations series: Education as an academic field taught at universities around the world emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes, each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics, and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories, and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: Mapping the Field, Purposes of Education, Curriculum, Schools and Education Systems, Learning and Human Development, Teaching and Teacher Education, Assessment and Evaluation. This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality.

Whatever Happened to High School History? Bob Davis, 1995-01-01 Bob Davis examines official high school history teaching and related government policies from the 1940s to the mid 1990s, providing essential background for those concerned with how history will be taught in the 21st century. Davis traces the demise of the old historiographical narrative of progress, the rise of an essentially content-free skills-based approach to education, and the emergence of the new orthodoxy of post-modern theory, identifying the weaknesses of each and suggesting fruitful directions for future development of history teaching. Whatever Happened to High School History? is a passionate and insightful account of crisis and decline in a subject that used to be the pillar of the secondary curriculum.

(Re)Constructing Memory: Textbooks, Identity, Nation, and State James H. Williams, Wendy D. Bokhorst-Heng, 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts: some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging, and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the

national narrative The authors discuss portrayals of past exclusions around religion ethnicity sexual orientation as they look at the shifting boundaries of insider and outsider This book is thus about who we are not only demographically but also in terms of the past especially how and whether we teach discredited pasts through textbooks The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive critical and positively bonding in increasingly larger and more inclusive contexts **Canadian Books in Print.
